Internet for the People Ben Tarnoff, 2022-06-14 For all the informational convenience the internet offers it is deeply flawed How can it be improved Writer Ben Tarnoff proposes one possibility in this intriguing book which urges the development of a public lane on the information superhighway It's worth checking out for yourself Seth MacFarlane Why is the internet so broken and what could ever possibly fix it In Internet for the People leading tech writer Ben Tarnoff offers an answer The internet is broken he argues because it is owned by private firms and run for profit Google annihilates your privacy and Facebook amplifies right wing propaganda because it is profitable to do so But the internet wasn't always like this it had to be remade for the purposes of profit maximization through a years long process of privatization that turned a small research network into a powerhouse of global capitalism Tarnoff tells the story of the privatization that made the modern internet and which set in motion the crises that consume it today The solution to those crises is straightforward deprivatize the internet Deprivatization aims at creating an internet where people and not profit rule It calls for shrinking the space of the market and diminishing the power of the profit motive It calls for abolishing the walled gardens of Google Facebook and the other giants that dominate our digital lives and developing publicly and cooperatively owned alternatives that encode real democratic control To build a better internet we need to change how it is owned and organized Not with an eye towards making markets work better but towards making them less dominant Not in order to create a more competitive or more rule

bound version of privatization but to overturn it Otherwise a small number of executives and investors will continue to make choices on everyone s behalf and these choices will remain tightly bound by the demands of the market It s time to demand an internet by and for the people now

Education John D. Skrentny, 2023-11-17 We are living in an era of veritable STEM obsession Not only do tech companies dominate our cultural imagination of American enterprise and financial growth we urgently need science based solutions to impending crises As a society we have poured enormous resources into cultivating young minds for STEM careers The US sponsors 209 distinct STEM education programs in 13 different federal agencies at a cost of more than 3 billion This spending is on top of countless initiatives from philanthropic foundations and corporate giving And yet we are facing a STEM worker crisis In this project sociologist John D Skrentny asks if we re investing so much in STEM education why are as many as 75% of graduates with STEM degrees opting out of STEM careers The problem is not education he argues but the available jobs Skrentny aims to bring a reality check to America s growing dedication to STEM education Each chapter highlights an aspect of STEM work culture that drives away bright minds ranging from workplace culture and burn and churn management practices to lack of job security to the constant need for training on new innovations to the racism and sexism that exclude non white and Asian people and women Skrentny shows that if we have any hope of crafting science based solutions to many of our most urgent societal issues we have to change the way we re treating these workers on whom our future depends SSC Junior Engineer Mechanical Recruitment Exam Guide 4th Edition Er.
