Teaching Science to English Language Learners Joyce Nutta, Nazan U. Bautista, Malcolm B. Butler, 2010-09-13

Books in the Teaching English Language Learners ELLs across the Curriculum Series are written specifically for pre and in service teachers who may not have been trained in ELL techniques but still find themselves facing the realities and challenges of today's diverse classrooms and learners. Each book provides simple and straightforward advice on how to teach ELLs through a given subject area and how to teach content to ELLs who are at different levels of English language proficiency than the rest of their class. Authored by both language and content area specialists, each volume arms readers with practical, teacher-friendly strategies and subject-specific techniques. *Teaching Science to English Language Learners* offers science teachers and teacher educators a straightforward approach for engaging ELLs learning science, offering examples of easy ways to adapt existing lesson plans to be more inclusive. The practical, teacher-friendly strategies and techniques included here are proven effective with ELLs and many are also effective with all students. The book provides context-specific strategies for the full range of the secondary sciences curriculum, including physical science, life science, earth and space science, science as inquiry, and history and nature of science, and more. A fully annotated list of web and print resources completes the book, making this a one-volume reference to help science teachers meet the challenges of including all learners in effective instruction. Special features: practical examples of science exercises make applying theory to practice simple when teaching science to ELLs; an overview of the National Science Education Standards offers useful guidelines for effective instructional and assessment practices for ELLs; in secondary grades, graphs, tables, and illustrations provide additional access points to the text in clear, meaningful ways.

Advocating for English Learners Diane Staehr Fenner, 2013-09-11

Embrace the future by ensuring English Learners have a voice in school. English Learners (ELs) are the fastest growing segment of the K-12 population. But ELs and their families, who are in the process of learning English and navigating an often unfamiliar education system, may not have a powerful enough voice to articulate their needs. Consequently, all teachers and administrators must advocate for this important, diverse group of students who will become tomorrow's workforce. This book demystifies the techniques of advocacy for ELs, including:

- A shared sense of responsibility for EL success
- Providing tools that every educator can use to ensure that ELs are effectively served
- An overview for administrators influencing policy and fostering a culture that meets EL needs
- Advocacy for ELs' success beyond Grade 12
- Equipping ELs for life after graduation, from higher education to career decisions

ELs will continue to grow in number, and leaving them and their families voiceless is simply not an option. No educator can miss this essential book. In many ways, the history of American Education is the history of a quest for equality. Dr. Staehr Fenner lends a human face to the experience of English Learners and encourages us to think in terms of what attributes ELs bring to their learning experience and how others can benefit from their presence in the classroom. This book is a promising

uplifting and much needed call for action Rosa Aronson Executive Director TESOL International Association Alexandria VA
