## **Fiber Fracture Fiber Fracture:**

**Fiber Fracture** M. Elices,J. Llorca,2002-11-15 The idea for this book came out of the EURESCO Conference on High Performance Fibers Euroconference on Fiber Fracture in 2000 Many of the books that are currently available look at different aspects of fiber processing properties or applications but none are focussed on the fracture behaviour of fibers This book presents the mechanisms and models of fiber fracture currently available for both natural and synthetic fibers and it is expected that increasingly there will be cross fertilization between the fields opening new frontiers in academic research and more competitive products for industry It covers the following areas of fiber fracture ceramic fibers glass fibers carbon fibers metallic fibers and thin wires polymeric fibers and carbon nanotubes

**Atlas of Fibre Fracture and Damage to Textiles** J. W. S. Hearle,B Lomas,W D Cooke,1998-07-14 This new retitled edition of Fibre Failure and Wear of Materials has been updated and expanded to include more examples from work at UMIST University of Manchester Institute of Science and Technology in the 1990s and to take account of recent research elsewhere It contains over 500 new micrographs to add to the 1 000 in the first edition and includes two new sections on forensic and medical studies Based on over 25 years of research at UMIST the book is concerned with how fibres fail under stress Until comparatively recently little was known about the way in which fibres break In this book about 20 different modes of fibre failure are examined Case studies have been selected both from the traditional uses of textiles in clothing and in household products such as sheets towels and carpets and also from the study of failure in textile structures used in industry and engineering for example seat belts and ropes This unique collection of more than 1500 scanning electron micrographs and other pictures for identifying failure modes together with the accompanying explanatory text provides fibre scientists polymer scientists and others working in textile research with a better understanding of fracture mechanisms The book will also be of interest to forensic scientists and medical specialists using fibre implants Finally it will help textile technologists and design engineers to manufacture improved textile products and to use them in ways which will maximise their life span

**Analysis of Failure in Fiber Polymer Laminates** Martin Knops,2008-07-31 Written by Puck's pupil and appointed successor Martin Knops this book presents Alfred Puck's failure model which among several other theories predicts fracture limits best and describes the failure phenomena in FRP most realistically as confirmed within the

World wide Failure Exercise Using Puck's model the composite engineer can follow the gradual failure process in a laminate and deduce from the results of the analysis how to improve the laminate design      Recent Advances in Fracture Mechanics W.G.
