Bezner Kerr, Hans Rudolf Herren, Barbara Gemmill-Herren, Caterina Batello Cattaneo, Franz-Theo Gottwald, 2023-10-13 In the past years there has been steady growth in work relating to agroecology. People-centred knowledge intensive and rooted to sustainability, it is now well established that agroecology matches the transformative approach called for by the 2030 Agenda: a transition to sustainable food and agriculture systems that ensures food security and nutrition for all, provides social and economic equity and conserves biodiversity and the ecosystem services on which agriculture depends. Although not a new concept, agroecology is today gaining interest worldwide among a wide range of actors as an effective answer to climate change and the interrelated challenges facing food systems, finding expression in the practices of food producers in grassroots social processes for sustainability and the public policies of many countries around the world. [The New Walford Guide to Reference Resources](#) Ray Lester, 2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information, saving you precious time and effort. For those looking for a selective and evaluative reference resource that really delivers on its promise, look no further. In addition to print sources, The New Walford naturally covers an extensive range of e-reference sources such as digital databanks, digital reference services, electronic journal collections, meta-search engines, networked information services, open archives, resource discovery services, and websites of premier organizations in both the public and private sectors. But rather than supplying a list of all available known resources as a web search engine might, The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful. With an emphasis on quality and sustainability, the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas. As a result, the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature. This ensures that The New Walford is clear, easy to use, and intuitive.
