LaFreniere, 2012-07      *Issues in Peace and Conflict Studies* CQ Researcher, 2010-10-12 Key Features      The Best American Science and Nature Writing 2016 Amy Stewart, 2020-12-15 This anthology collects some of the year's best science and nature writing from climate change to killer beetles an exposé of nail salons and more As guest

editor Amy Stewart says in her introduction science writers get into the game with all kinds of noble high minded ambitions We want to educate To enlighten But at the end of the day we re all writers We re just like novelists memoirists and poets We re entertainers The writers in this anthology pull off that wonderful feat of turning hard research into page turning narrative From a Pulitzer Prize winning essay on the earthquake that could decimate the Pacific Northwest to the astonishing work of investigative journalism that transformed the nail salon industry this is a collection of hard hitting and beautifully composed writing on the wonders dangers and oddities of scientific innovation and our natural world The Best American Science and Nature Writing 2016 includes Kathryn Schulz Sarah Maslin Nir Charles C Mann Oliver Sacks Elizabeth Kolbert Gretel Ehrlich and others      *The Complete Idiot's Guide to Global Warming* Michael Tennesen,2008 The rapid warming of the Earth s climate has been a concern for decades In the past there were sceptics who either doubted global climate change altogether or who at least doubted that humanity was the cause but today almost all scientists agree that a global warming trend is evident and caused by human activity Though many of us understand that this means temperatures will on average rise the science and the resulting social economic and political implications of such a change are far reaching and complex

The Anthropocene in Global Media Leslie Sklair,2020-11-22 This book offers the first systematic study of how the Anthropocene is reported in mass media globally drawing parallels between the use or misuse of the term and the media s attitude towards the associated issues of climate change and global warming Identifying the potential dangers of the Anthropocene provides a useful path into a variety of issues that are often ignored misrepresented or sidelined by the media These dangers are widely discussed in the social sciences environmental humanities and creative arts and this book includes chapters on how the contributions of these disciplines are reported by the media Our results suggest that the natural science and mass media establishments and the business and political interests which underpin them tend to lean towards optimistic reassurance the good Anthropocene rather than pessimistic alarmist stories in reporting the Anthropocene In this volume contributors explore how dangerous this neutralizing of the Anthropocene is in undermining serious global action in the face of the potential existential risks confronting humanity The book presents results from media in more than 100 countries in all major languages across the globe It covers the reporting of key environmental issues such as the impact of climate change and global warming on oceans forests soil biodiversity and the biosphere We offer explanations for differences and similarities in how the media report the Anthropocene in different regions of the world In doing so the book argues that though it is still controversial the idea of the Anthropocene helps to concentrate minds and behaviour in confronting ongoing ecological and Coronavirus crises The Anthropocene in Global Media will be of interest to students and scholars of environmental studies media and communication studies and the environmental humanities and all those who are concerned about the survival of humans on planet Earth      *Global Environmental Politics* Gabriela Kütting,2010-09-13 Global Environmental Politics is the perfect introduction to this increasingly significant area The text combines an accessible

introduction to the most important environmental theories and concepts with a series of detailed case studies of the most pressing environmental problems Features and benefits of the book Explains the most important concepts and theories in environmental politics Introduces environmental politics within the context of political science and international relations theories Demonstrates how the concepts and theories apply in a wide variety of real world contexts Case studies include the most important environmental issues from climate change and biodiversity to forests and marine pollution Each chapter is written by an established international authority in the field This exciting new textbook is essential reading all students of environmental politics and will be of great interest to students of International Relations and Political Economy Climate Diplomacy from Rio to Paris William Sweet,2016-12-06 The essential primer for understanding climate diplomacy describing both the major players and the path to progress from the 1992 Rio Summit to the 2015 Paris Climate Conference Climate Diplomacy from Rio to Paris is the first accessible overview of climate diplomacy in its first quarter century The author who has reported on energy and climate for two decades provides readers with a nuanced account of the major players and their interests from the United States the European Union and China to environmental organizations the United Nations and the Vatican and analyzes the outcomes of the major climate conferences at Rio Kyoto Copenhagen and Paris **The Best American Science and Nature Writing 2015** Rebecca Skloot,2020-12-15 This anthology of essays and articles explores topics ranging from untouched wilderness to scientific ethics and the nature of curiosity itself Scientists and writers are both driven by a dogged curiosity immersing themselves in detailed observations that over time uncover larger stories As Rebecca Skloot says in her introduction all the stories in this collection are written by and about people who take the time and often a substantial amount of risk to follow curiosity where it may lead so we can all learn about it The Best American Science and Nature Writing 2015 includes work from both award winning writers and up and coming voices in the field From Brooke Jarvis on deep ocean mining to Elizabeth Kolbert on New Zealand s unconventional conservation strategies this is a group that celebrates the growing diversity in science and nature writing alike Altogether the writers honored in this volume challenge us to consider the strains facing our planet and its many species while never losing sight of the wonders we re working to preserve for generations to come This anthology includes essays and articles by Sheri Fink Atul Gawande Leslie Jamison Sam Kean Seth Mnookin Matthew Power Michael Specter and others *Understanding Religion and Popular Culture* Elizabeth Rae Coody,Dan W. **Environmental Philosophy** Liam Leonard, John Barry, Marius De Geus, 2013-10-24 What impact are we having on the environment around us How can we limit the effect of human life on the natural world These questions and more are considered in *Advances in Sustainability and Environmental Justice* volume 13 which looks at environmental philosophy humanity's place in the world and how we can live in harmony with our planet

**Japan at Nature's Edge** Ian Jared Miller, Julia Adeney Thomas, Brett L. Walker, 2013-07-01 *Japan at Nature's Edge* is a timely collection of essays that explores the relationship between Japan's history culture and physical environment It greatly expands the focus of previous work on Japanese modernization by examining Japan's role in global environmental transformation and how Japanese ideas have shaped bodies and landscapes over the centuries The immediacy of Earth's environmental crisis a predicament highlighted by Japan's March 2011 disaster brings a sense of urgency to the study of Japan and its global connections The work is an environmental history in the broadest sense of the term because it contains writing by environmental anthropologists a legendary Japanese economist and scholars of Japanese literature and culture The editors have brought together an unparalleled assemblage of some of the finest scholars in the field who rather than treat it in isolation or as a unique cultural community seek to connect Japan to global environmental currents such as whaling world fisheries mountaineering and science mining and industrial pollution and relations with nonhuman animals The contributors assert the importance of the environment in understanding Japan's history and propose a new balance between nature and culture one weighted much more heavily on the side of natural legacies This approach does not discount culture Instead it suggests that the Japanese experience of nature like that of all human beings is a complex and intimate negotiation between the physical and cultural worlds Contributors Daniel P Aldrich Jakobina Arch Andrew Bernstein Philip C Brown Timothy S George Jeffrey E Hanes David L Howell Federico Marcon Christine L Marran Ian Jared Miller Micah Muscolino Ken ichi Miyamoto Sara B Pritchard Julia Adeney Thomas Karen Thornber William M Tsutsui Brett L Walker Takehiro Watanabe

Tools for Critical Thinking in Biology Stephen H. Jenkins, 2015-04-28 The American Association for the Advancement of Science's report on Vision and Change in Undergraduate Biology Education suggests that instructors can no longer rely solely on trying to cover a syllabus packed with topics but rather should introduce fewer concepts but present them in greater depth They further suggest that the principles embodied in a set of core concepts and competencies should be the basis for all undergraduate biology courses including those designed for nonmajors The theme of Tools for Critical Thinking in Biology will be the first and most fundamental of these competencies the ability to apply the process of science Biology courses and curricula must engage students in how scientific inquiry is conducted including evaluating and interpreting scientific explanations of the natural world The book uses diverse examples to illustrate how experiments work how hypotheses can be tested by systematic and comparative observations when experiments aren't possible how models are useful in science and how sound decisions can be based on the weight of evidence even when uncertainty remains These are fundamental issues in the process of science that are important for everyone to understand whether they pursue careers in science or not Where other introductory biology textbooks are organized by scientific concepts Tools for Critical Thinking in Biology will instead show how methods can be used to test hypotheses in fields as different as ecology and medicine using contemporary case studies The book will provide students with a deeper understanding of the strengths and weaknesses of such methods for answering new questions and will thereby change the way they think about the fundamentals of biology

Climate Change Brian C. Black, David M. Hassenzahl Ph.D., Jennie C. Stephens, Gary J. Weisel, Nancy Gift, 2013-01-08 This book provides a holistic consideration of climate change that goes beyond pure science fleshing out the discussion by considering cultural historical and policy driven aspects of this important issue Climate change is a controversial topic that promises to reframe rudimentary ideas about our world and how we will live in it The articles in Climate Change An Encyclopedia of Science and History are designed to inform readers decision making through the insight of scholars from around the world each of whom brings a unique approach to this topic The work goes beyond pure science to consider other important factors weighing the cultural historical and policy driven contributors to this issue In addition the book explores the ideas that have converged and evolved in order

to clarify our current predicament By considering climate change in this holistic fashion this reference collection will prepare readers to consider the issue from every angle Each article in the work is suitable for general readers particularly students in high school and college and is intended to inform and educate anyone about climate change providing valuable information regarding the stages of mitigation and adaptation that are occurring all around us *Issues for Debate in Environmental Management* CQ Researcher,2010 *Issues for Debate in Environmental Management* is a contemporary collection of articles covering core issues within the broad topic of environmental management The book is intended to supplement core courses in the Business and Management curriculum titled Environmental Management Sustainability and Business and Society among other similarly titled courses The book begins with a feature article titled The New Environmentalism Can New Business Policies Save the Environment and progresses through 16 articles of topics generally covered in environmental management courses including global warming the green economy clean energy sources water sources and other opportunities for business and management exploration *Humanity's Footprint* Walter K Dodds,2008-02-06 For the first time in history humans have exceeded the sustaining capacity of Earth's global ecosystems Our expanding footprint has tremendous momentum and the insidious explosion of human impact creates a shockwave that threatens ecosystems worldwide for decades possibly centuries Walter K Dodds depicts in clear nontechnical terms the root causes and global environmental effects of human behavior He describes trends in population growth resource use and global environmental impacts of the past two centuries such as greenhouse effects ozone depletion water pollution and species extinctions and introductions Dodds also addresses less familiar developments such as the spread of antibiotic resistant genes in bacteria and the concentration of pesticides in the Arctic and other remote ecosystems He identifies fundamental human activities that have irreversible effects on the environment and draws on recent social science and game theory results to explain why people use more than their share Past behavior indicates that as resources grow scarce humans will escalate their use of what remains instead of managing their consumption *Humanity's Footprint* paints a lively but ultimately sobering picture of our environmental predicament Dodds calls for a consilient approach to socioenvironmental restoration that draws on new thinking from across disciplines to develop sustainable solutions to global environmental problems
