Mythomania: Tales of Our Times, from Apple to Isis Peter Conrad, 2017-01-10 Weaves ancient myth into modern celebrity and consumerist culture to expose the absurdity and occasional insanity of twenty first century society economy and politics Despite a proclaimed respect for scientific reason humans are still as intrigued by myth as their remote ancestors Laptops and smartphones are sold under a logo that invokes the forbidden fruit of the Garden of Eden skimpily clad classical nymphs cavort in TV reality shows Narcissus makes a comeback whenever we snap a selfie Mythical creatures such as handsome vampires abound in best selling novels Myth has also invaded the political realm now that terrorists brandish black flags and recite theological mantras as they martyr themselves In twenty seven self contained entries Conrad illuminates in his own remarkable way subjects from the British Queen to the Kardashians via Banksy vaping and the inception of the Large Hadron Collider In Judge Judy he shows a matronly Roman goddess dispensing justice with a fly swatter In the metamorphosis of Caitlyn Jenner from Olympic athlete and paterfamilias into idealized female form he finds parallels to the transformations of the residents of Mount Olympus

Risky Lovers Series Love Trade Love Lessons Love Game The Closing of the Net Monica Horten, 2016-05-18 This inspirational book provides the backstory to current attempts by states and corporations to control the Internet. It explains key issues such as privacy, net neutrality, and copyright in a way that is accessible to non-experts as well as providing a clear authoritative context for academic study. The Closing of the Net explains why apps are never free and how data profiling got into politics. How the entertainment industries went head-to-head with Internet companies over online copyright. Why we got the GDPR General Data Protection Regulation and why Europe has stronger privacy laws than the US. How post-Snowden surveillance politics is embedded in data retention law. Why net neutrality matters. How cloud service Megaupload was brought down. Monica Horten's compelling account of these issues concludes with an outline of the risks we face in the future if monitoring and blocking of the Internet becomes the norm. And the results are chilling. This book is a must-read for all followers of cyber policy and is suitable for courses addressing digital media and society, communications policy, Internet and copyright law.
