

2.36Situation:

Laminar flow occurs between two horizontal parallel plates. The velocity distribution is

$$u = -\frac{1}{2\mu} \frac{dp}{ds} (Hy - y^2) + u_e \frac{y}{H}$$

Pressure p decreases with distance s , and the speed of the upper plate is u_e . Note that u_e has a negative value to represent that the upper plate is moving to the left.

Moving plate: $y = H$.

Stationary plate: $y = 0$.

Find:

- Whether shear stress is greatest at the moving or stationary plate.
- Location of zero shear stress.
- Derive an expression for plate speed to make the shear stress zero at $y = 0$.

Sketch:**PLAN**

By inspection, the rate of strain (du/dy) or slope of the velocity profile is larger at the moving plate. Thus, we expect shear stress τ to be larger at $y = H$. To check this idea, find shear stress using the definition of viscosity: $\tau = \mu (du/dy)$. Evaluate and compare the shear stress at the locations $y = H$ and $y = 0$.

SOLUTION

Part (a)

- Shear stress, from definition of viscosity

$$\begin{aligned} \tau &= \mu \frac{du}{dy} \\ &= \mu \frac{d}{dy} \left[-\frac{1}{2\mu} \frac{dp}{ds} (Hy - y^2) + u_e \frac{y}{H} \right] \\ &= \mu \left[-\frac{H}{2\mu} \frac{dp}{ds} + \frac{y}{\mu} \frac{dp}{ds} + \frac{u_e}{H} \right] \\ \tau(y) &= -\frac{(H - 2y)}{2} \frac{dp}{ds} + \frac{\mu u_e}{H} \end{aligned}$$

Fluid Mechanics for Engineers Meinhard T. Schobeiri, 2010-03-27 The contents of this book covers the material required in the Fluid Mechanics Graduate Core Course MEEN 621 and in Advanced Fluid Mechanics a Ph D level elective course MEEN 622 both of which I have been teaching at Texas A M University for the past two decades While there are numerous undergraduate fluid mechanics texts on the market for engineering students and instructors to choose from there are only limited texts that comprehensively address the particular needs of graduate engineering fluid mechanics courses To complement the lecture materials the instructors more often recommend several texts each of which treats special topics of fluid mechanics This circumstance and the need to have a textbook that covers the materials needed in the above courses gave the impetus to provide the graduate engineering community with a coherent textbook that comprehensively addresses their needs for an advanced fluid mechanics text Although this text book is primarily aimed at mechanical engineering students it is equally suitable for aerospace engineering civil engineering other engineering disciplines and especially those practicing professionals who perform CFD simulation on a routine basis and would like to know more about the underlying physics of the commercial codes they use Furthermore it is suitable for self study provided that the reader has a sufficient knowledge of calculus and differential equations In the past because of the lack of advanced computational capability the subject of fluid mechanics was artificially subdivided into inviscid viscous laminar turbulent incompressible compressible subsonic supersonic and hypersonic flows

Chapman & Hall's Complete Fundamentals of Engineering Exam Review Workbook Professional Engineer Review Course, 2013-06-29 I am often asked the question Should I get my PE license or not Unfortunately the answer is Probably First let s take a look at the licensing process and understand why it exists then take a look at extreme situations for an attempt at a yes no answer and finally consider the exams All 50 have a constitutionally defined responsibility to protect the public From an engineering point of view as well as many other professions this responsibility is met by the process of licensure and in our case the Professional Engineer License Though there are different experience requirements for different states the meaning of the license is common The licensee demonstrates academic competency in the Fundamentals of Engineering by examination Principles and Practices at PE time The licensee demonstrates qualifying work experience at PE time The licensee ascribes to the Code of Ethics of the NSPE and to the laws of the state of registration Having presented these qualities the licensee is certified as an Intern Engineer and the state involved has fulfilled its constitutionally defined responsibility to protect the public
