Field Evaluation In The Intelligence And Counterintelligence Context Workshop Summary:

Field Evaluation in the Intelligence and Counterintelligence Context National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Planning Committee on Field Evaluation of Behavioral and Cognitive Sciences-Based Methods and Tools for Intelligence and Counterintelligence, 2010-03-16 On September 22 23 2009 the National Research Council held a workshop on the field evaluation of behavioral and cognitive sciences based methods and tools for use in the areas of intelligence and counterintelligence Broadly speaking the purpose of the workshop was to discuss the best ways to take methods and tools from behavioral science and apply them to work in intelligence operations More specifically the workshop focused on the issue of field evaluation the testing of these methods and tools in the context in which they will be used in order to determine if they are effective in real world settings This book is a summary and synthesis of the two days of presentations and discussions that took place during the workshop The workshop participants included invited speakers and experts from a number of areas related to the behavioral sciences and the intelligence community The discussions covered such ground as the obstacles to field evaluation of behavioral science tools and methods the importance of field evaluation and various lessons learned from experience with field evaluation in other areas **Behavioral Science and Security** United States. Congress. House. Committee on Science, Space, and Technology (2011). Subcommittee on Investigations and Oversight, 2011

Interrogation and Torture Steven J. Barela, Mark Fallon, Gloria Gaggioli, Jens David Ohlin, 2020 This book develops for the first time a comprehensive discussion regarding the legality of torture and the efficacy of interrogation Scientific research has concluded that torture is not effective So what interrogational methods are effective and how does one deploy those methods in such a way that is consistent with law and morality *Researching National Security Intelligence* Stephen Coulthart, Michael Landon-Murray, Damien Van Puyvelde, 2019-11-01 Researchers in the rapidly growing field of intelligence studies face unique and difficult challenges ranging from finding and accessing data on secret activities to sorting through the politics of intelligence successes and failures to making sense of complex socio organizational or psychological phenomena The contributing authors to *Researching National Security Intelligence* survey the state of the field and demonstrate how incorporating multiple disciplines helps to generate high quality policy relevant research Following this approach the volume provides a conceptual empirical and methodological toolkit for scholars and students informed by many disciplines history political science public administration psychology communications and journalism This collection of essays written by an international group of scholars and practitioners propels intelligence studies forward by demonstrating its growing depth by suggesting new pathways to the creation of knowledge and by identifying how scholarship can enhance practice and accountability *Evidence-Based Counterterrorism Policy* Cynthia Lum, Leslie W. Kennedy, 2011-11-06 In the past eight years there has been a massive increase in government spending on counterterrorism intervention development

and implementation Given this increase there are two evidence based policy questions that are important to address Is there evidence that any of these programs are effective in other words can they be shown to be linked to reducing terrorism terrorist recruiting or to improving the response and management of terrorist events Do these interventions have secondary or collateral effects that may be costly harmful illegal beneficial or otherwise As Lum and Kennedy discovered in an evaluation research on counterterrorism interventions only a minuscule number of empirical studies of terrorism exist and there is an almost complete absence of evaluation research on counter terrorism strategies This is startling given the enormous increases in the development and use of counter terrorism programs as well as spending on counter terrorism activity Even more disconcerting was the nature of the evaluations we did find some programs were shown to either have no discernible effect on terrorism or lead to increases in terrorism The emphasis of the need for empirical research in evaluating interventions and informing policy cannot be overstated and is the primary goal of Evidence Based Counterterrorism Policy

The Academic-Practitioner Divide in Intelligence Studies Rubén Arcos,Nicole K. Drumhiller,Mark Phythian,2022-04-14 Internationally the profession of intelligence continues to develop and expand So too does the academic field of intelligence both in terms of intelligence as a focus for academic research and in terms of the delivery of university courses in intelligence and related areas To a significant extent both the profession of intelligence and those delivering intelligence education share a common aim of developing intelligence as a discipline However this shared interest must also navigate the existence of an academic practitioner divide Such a divide is far from unique to intelligence it exists in various forms across most professions but it is distinctive in the field of intelligence because of the centrality of secrecy to the profession of intelligence and the way in which this constitutes a barrier to understanding and openly teaching about aspects of intelligence How can co operation in developing the profession and academic study be maximized when faced with this divide How can and should this divide be navigated *The Academic Practitioner Divide in Intelligence* provides a range of international approaches to and perspectives on these crucial questions

Activity-Based Intelligence: Principles and Applications Patrick Biltgen,Stephen Ryan,2016-01-01 This new resource presents the principles and applications in the emerging discipline of Activity Based Intelligence ABI This book will define clarify and demystify the tradecraft of ABI by providing concise definitions clear examples and thoughtful discussion Concepts methods technologies and applications of ABI have been developed by and for the intelligence community and in this book you will gain an understanding of ABI principles and be able to apply them to activity based intelligence analysis The book is intended for intelligence professionals researchers intelligence studies policy makers government staffers and industry representatives This book will help practicing professionals understand ABI and how it can be applied to real world problems

The Logic of Intelligence Analysis Karl Spielmann,2018-06-12 This book discusses the application of hypothesis testing to the practice of intelligence analysis By drawing on longstanding procedures of scientific method particularly hypothesis testing this book strongly

critiques standard intelligence analytic practices It shows these practices to be inadequate as they are illogical in terms of what formal philosophy says any intelligence analysts can realistically be expected to know and for the future when analysts will face pressures to adapt to digital age modeling techniques The methodology focuses on identifying and remedying analytic errors caused by analyst cognitive biases and by foreign denial and deception To demonstrate that it is a practical tool it walks analysts through a case study step by step to show how its hypothesis testing can be implemented It also invites a comparative test in the real world with any other intelligence methodologies to assess its strengths and weaknesses in predicting the outcome of an actual live intelligence issue This book will be of much interest to students of intelligence studies public policy and national security as well as practitioners

Improving Bayesian Reasoning: What Works and Why? Gorka Navarrete, David R. Mandel, 2016-02-02 We confess that the first part of our title is somewhat of a misnomer Bayesian reasoning is a normative approach to probabilistic belief revision and as such it is in need of no improvement Rather it is the typical individual whose reasoning and judgments often fall short of the Bayesian ideal who is the focus of improvement What have we learnt from over a half century of research and theory on this topic that could explain why people are often non Bayesian Can Bayesian reasoning be facilitated and if so why These are the questions that motivate this Frontiers in Psychology Research Topic Bayes theorem named after English statistician philosopher and Presbyterian minister Thomas Bayes offers a method for updating one's prior probability of an hypothesis H on the basis of new data D such that $P(H|D) = \frac{P(D|H)P(H)}{P(D)}$ The first wave of psychological research pioneered by Ward Edwards revealed that people were overly conservative in updating their posterior probabilities i.e. $P(H|D) < P(H)$ A second wave spearheaded by Daniel Kahneman and Amos Tversky showed that people often ignored prior probabilities or base rates where the priors had a frequentist interpretation and hence were not Bayesians at all In the 1990s a third wave of research spurred by Leda Cosmides and John Tooby and by Gerd Gigerenzer and Ulrich Hoffrage showed that people can reason more like a Bayesian if only the information provided takes the form of non relativized natural frequencies Although Kahneman and Tversky had already noted the advantages of frequency representations it was the third wave scholars who pushed the prescriptive agenda arguing that there are feasible and effective methods for improving belief revision Most scholars now agree that natural frequency representations do facilitate Bayesian reasoning However they do not agree on why this is so The original third wave scholars favor an evolutionary account that posits human brain adaptation to natural frequency processing But almost as soon as this view was proposed other scholars challenged it arguing that such evolutionary assumptions were not needed The dominant opposing view has been that the benefit of natural frequencies is mainly due to the fact that such representations make the nested set relations perfectly transparent Thus people can more easily see what information they need to focus on and how to simply combine it This Research Topic aims to take stock of where we are at present Are we in a proto fourth wave If so does it offer a synthesis of recent theoretical disagreements The second part of the title orients the

reader to the two main subtopics what works and why In terms of the first subtopic we seek contributions that advance understanding of how to improve people s abilities to revise their beliefs and to integrate probabilistic information effectively The second subtopic centers on explaining why methods that improve non Bayesian reasoning work as well as they do In addressing that issue we welcome both critical analyses of existing theories as well as fresh perspectives For both subtopics we welcome the full range of manuscript types
