**Stuarts' Field Guide to National Parks & Nature Reserves of SA** Chris Stuart, 2018-01-01 Stuarts Field Guide to National Parks and Nature Reserves of South Africa is an indispensable guide to the country's best and most accessible conservation areas. Written by two prominent conservationists, this new edition with a slight name change has been thoroughly revised and updated. The 43 featured reserves are arranged by province. Information details the history, location, landscape, geology, vegetation, with maps and wildlife: mammals, birds, reptiles, amphibians, fish, and insects of each reserve. Text panels list the highlights and provide key facts about each park's wildlife, climate, facilities, and activities, as well as critical warnings for visitors. More than 900 colour photographs support the text. Detailed park maps indicate places of interest, including where to view particular animals. At the back of the book is a concise pictorial ID guide featuring the birds, mammals, amphibians, reptiles, flowers, and trees most commonly seen in the reserves. This is a handy, informative must-have guide to South Africa's famously diverse and richly populated parks and reserves. *The Mammal Guide of Southern Africa* Burger Cillie, 2004 With colour photos, distribution maps, spoor, and photos of faeces, and an identification key. **National Park Science** Jane Carruthers, 2017-08-17 South Africa is renowned for its wildlife and environmental conservation in iconic national parks such as the Kruger, one of the world's first formal protected areas. However, this is the first book to thoroughly analyse and explain the interesting and changing scientific research that has been accomplished in South Africa's national parks during the twentieth century. Providing a fascinating and thorough historical narrative based on an extensive range of sources, this text details the evolution of traditional natural history pursuits to modern conservation science in South Africa, covering all research areas of conservation biology and all the national parks around the country. It reveals the interaction between the international context, government, learning institutions, and the public that has shaped the present conservation arena. A complex story that will interest and inform not only those involved in conservation science of South Africa but worldwide.
