Fifty Years of Bangladesh, 1971-2021 Taj Hashmi, 2022-04-22 This book the first historical sociology of its kind concerning Bangladesh examines the country s what went wrong syndrome during the first fifty years of its existence 1971 2021 The work is an exception to the traditional studies on modern and contemporary Bangladesh The study is also a post history of united Pakistan Busting several myths it sheds light on many known and unknown facts about the history politics society and culture of the country Besides being a twice born country liberated twice from the British in 1947 and from West Pakistanis in 1971

it is also an artificial entity suffering from acute crises of culture development governance and identity Hashmi attributes the culture and identity crises to the demographic byproducts of bad governance In addition to being overpopulated Bangladesh is also resource poor and has one of the most unskilled populations largely lumpen elements and peasants According to Marx these people represent the unchanging remnants of the past The second round of independence empowered these lumpen classes who suffer from an identity crisis and never learn the art of governance The proliferation of pseudo history about liberation has further divided the polity between the two warring tribes who only glorify their respective idols Mujib and Zia Pre political and pre capitalist peasants lumpen elements lack of mutual trust and respect have further plagued Bangladesh turning it into one of the least governable corrupt and inefficient countries It is essential to replace the pre capitalist order of the country run by multiple lumpen classes with capitalist and inclusive institutions Fifty Years Ago United States Holocaust Memorial Museum,1994 Human Rights Fifty Years On Tony Evans,1998-11-15 This book offers a critical reappraisal of the project for universal human rights The twentieth thirtieth and fortieth anniversaries of the Universal Declaration of Human Rights were all marked by the publication of volumes that celebrated achievements in the field of human rights Many of these took a self congratulatory line that emphasized progress on the protection of human rights ignoring the facts of torture genocide structural deprivation and the routine exclusion of some groups from political economic and social participation This book brings together some of the leading critics of the current project for universal human rights including Noam Chomsky and Johan Galtung as a counterweight to triumphalist approaches on the fiftieth anniversary of the Declaration *Fifty Years of Change on the U.S.-Mexico Border* Joan B. Anderson,James Gerber,2009-08-17 Winner Book Award Association for Borderland Studies 2008 The U S and Mexican border regions have experienced rapid demographic and economic growth over the last fifty years In this analysis Joan Anderson and James Gerber offer a new perspective on the changes and tensions pulling at the border from both sides through a discussion of cross border economic issues and thorough analytical research that examines not only the dramatic demographic and economic growth of the region but also shifts in living standards the changing political climate and environmental pressures as well as how these affect the lives of people in the border region Creating what they term a Border Human Development Index the authors rank the quality of life for every U S county and Mexican municipio that touches the 2 000 mile border Using data from six U S and Mexican censuses the book adeptly illustrates disparities in various aspects of economic development between the two countries over the last six decades Anderson and Gerber make the material accessible and compelling by drawing an evocative picture of how similar the communities on either side of the border are culturally yet how divided they are economically The authors bring a heightened level of insight to border issues not just for academics but also for general readers The book will be of particular value to individuals interested in how the border between the two countries shapes the debates on quality of life industrial growth immigration cross border integration and economic and

Fifty Years of Human Rights in Chile Valentina Infante-Batiste, Richard D. Wilkinson, 2025-01-29 This book examines the struggle for human rights in Chile since 1973 and celebrates the academic

work and activism of Latin Americanist Alan Angell. It analyses Chileans' collective memory of the Pinochet regime and the role of contemporary opponents of the advancement of human rights. Its focus on a single country allows for a more detailed exploration of memory and human rights than those in comparable treatments of these topics in the Southern Cone. The book brings together contributors connected to Angell, Oxford University's Latin American Centre and the UK more broadly through their studies, research and personal histories. They include two former ministers in the Boric government, one of whom is a former president of the Inter American Commission on Human Rights. Through its unique structure, timing and thematic approach, the book provides valuable insights to undergraduate and postgraduate students as well as lecturers and researchers.
