Egoism Nayef R.F. Al-Rodhan,2022-01-01 What makes us who we are Are we born good or evil Do we have free will What drives our behaviour and why Can technology change what it means to be human In this thoroughly revised second edition of Emotional Amoral Egoism Professor Nayef Al Rodhan demonstrates the impact of our innate predispositions on key issues from conflict inequality and transcultural understanding to Big Data fake news and the social contract However it is the societies we live in and their governance structures that largely determine how we act on our innate predispositions

Consequently Al Rodhan proposes a new and sustainable good governance paradigm which must reconcile the ever present tension between the three attributes of human nature Emotional Amoral Egoism and the nine critical needs of human dignity This book is a perfect resource for enlightened readers academics and policy makers interested in how our innate instincts and tendencies shape the world we live in and how the interplay between neurophilosophy and policy can be harnessed for pragmatic and sustainable peace security and prosperity solutions for all at all times and under all circumstances *The*

The Virtual Mind Niklas Hageback, 2017-08-07 The Virtual Mind Designing the Logic to Approximate Human Thinking through an in depth and multidisciplinary review outlines and defines the underpinnings for modelling human thinking through approximating the mind Whilst there are plenty of efforts underway trying to mimic the brain its complexities have so far proven insurmountable But replicating the abstract notion of the mind provides a viable and quicker route Broadly the mind consists of a conscious and an unconscious part with separate logic schemes and these absorbs reality in diverging chunks with the former truncated through narratives and norms and the latter able to amass broader perceptions of reality These are held together and controlled through a governing mechanism With the replication and establishment of the mind s mechanistic rules and dynamic constants tested through a big data approach from public media it allows for standardization and machine generated human thinking a Virtual Mind A virtual mind is able to cover a wide array of applications in particular forecasting of human behavior and decision making In essence the whole socioeconomic spectra can be captured including politics financial markets and consumer patterns Another area of potential application

would be to augment various game software and of course it would be applicable for the man machine connect The book guides the reader on how to develop and produce a machine generated virtual mind in a step by step manner It is a must for anyone with an interest in artificial intelligence the design and construction of the next generation of computer logic and it provides an enhanced understanding of mankind s greatest mystery the workings of the mind Niklas Hageback has extensive experience of risk modelling and financial analytics working at tier one financial institutions and consulting firms such as Deutsche Bank KPMG and Goldman Sachs where he held regional executive risk management and oversight roles in both Europe and Asia
