Different Is Awesome:

Different Is Awesome! Ryan Haack, 2015-07-07 A little boy brings his older brother born with one hand for show and tell. The students ask him all sorts of questions about how he does things with one hand and realize that he can do anything they can do he just does it differently. Along the way they notice that we're all different in one way or another leading to the realization that not only are there differences a similarity we all share but they are what make us unique AND AWESOME

Different Drummer Douglass Andrew Morrison, 2021-11-04 Andreas Gruentzig performed the first coronary artery balloon angioplasty in 1977. Shortly after that Doug completed his medical education and training and determined to contribute to the field. Gruentzig's work had spawned. In 1984 just as things were taking off Doug developed a cervical disc with neurologic impairment of his right arm. That's when his neurosurgeons broke the bad news his interventional cardiology career was over. Or was it? Doug elected physical therapy including cervical traction rather than the proposed surgery. The career disruption elicited a deep depression. This prompted him to seek psychiatric care. It also made him aware of the steep price many people in his field were paying for repeated exposures to life and death situations. This created a dilemma akin to soldiers in battle including the associated problems of burnout, depression, substance abuse, PTSD, and suicide. Over months the neurologic and psychologic symptoms improved. Defying the experts' predictions he was able to resume an interventional cardiology career and follow in the footsteps of many cardiac interventional and surgical heroes. As he describes in chapter 12: My high risk plasty career could not have occurred without two things: the shared courage of many of my high risk patients and their families and the psychiatric care I received throughout much of my medical practice. Doug's cardiology practice included thirty-one years of care for American veterans in four different university-affiliated Veterans Affairs VA hospitals. The culmination of his academic and VA career was a five-year 1995-2000 sixteen-hospital VA Cooperative randomized clinical trial: The Angina With Extremely Serious Operative Mortality Evaluation (AWESOME) trial and registry compared plasty with bypass surgery for high risk patients with acute coronary syndromes. Doug followed his academic stint with fourteen years of private practice in rural America where he applied the AWESOME hypothesis in the real world. Today coronary angioplasty with stents has become the standard emergency care for acute myocardial infarction and other medically refractory acute coronary syndromes. This book recounts the role Doug played in the plasty revolution, the price he paid for his success, the debt he owes to many heroes, and his hopes for the future for patients and care providers. **Takio**

In a chorus of voices, a fractious cast of well-wishers narrates Adam's coming of age in Israel, his newly devout father, and the mystic rituals he practiced on his young son, his best friend Abbie, who points the way to joyful transgression. Khalil, a Palestinian poet, who offers a glimpse of a different way to be, and Adam himself, filled with shame and desire as he faces the brokenness of his world.
