

THE DIGESTIVE SYSTEM

Mastication or chewing is the first step of digestion. Chewing increases the surface area of foods to allow more efficient break-down by enzymes.

Salivary amylase begins digesting starch into polysaccharides.

Lingual lipase begins breaking down fat...

The digestion of proteins in the stomach occurs mainly due to the action of hydrochloric acid (HCl) and an enzyme called pepsin. Pepsin forms in the stomach when pepsinogen reacts with HCl. Pepsin breaks down proteins into polypeptides.

Hydrochloric acid produced by parietal cells present in the lining of the stomach increases the acidity of the bolus to pH=2.0. This deactivates the salivary amylase and stops the digestion of carbohydrates until they reach the small intestine.

Villi and microvilli of the small intestine are tiny structures that cover the walls and look like fingers. They increase the surface area and maximize the absorption of nutrients from food. Water soluble vitamins and minerals are absorbed into the bloodstream. Bile is needed for the absorption of fat-soluble vitamins. Fat-soluble vitamins enter the lymph vessels before making their way into the bloodstream.

No further digestion occurs in the large intestine except for the digestion of a small amount of fiber by the colon's bacteria population.

Pancreatic juices containing digestive enzymes are secreted into the small intestine to continue digesting macronutrients.

Polypeptides are broken down into Amino Acids.

Bile, a digestive juice manufactured by the liver and stored in the gallbladder, is released into the small intestine to emulsify fats.

unit on nutrition will give students an understanding of how nutrition is an important part of our daily lives We Are What We Eat will be the major theme throughout this unit The lessons will delve into the basic food groups the nutritional value of the foods we eat how our bodies digest and use food the importance of water and fiber in our diet food labels food preparation food allergies and food safety Within each lesson there are lesson plans notes questions experiments worksheets and other fun activities to reinforce this nutrition unit This Life Science lesson provides a teacher and student section with a variety of reading passages activities crossword word search and answer key to create a well rounded lesson plan **Food, Nutrition and Hygiene - According to NEP-2020** R. Bansal,2021-10-19 The book Food Nutrition and Hygiene has been written in accordance with the latest syllabus prescribed for different universities that have adopted the common unified syllabus under the National Education Policy 2020 The most important thing that the Covid 19 pandemic taught us is that health is the real wealth The pandemic was crucial in making us understand the importance of having good health When everything else fails we only have our health to depend on Having the basic knowledge of food and nutrition is absolutely essential in today's world Studying a food science and nutrition course will provide students with an understanding of trends and how to distinguish fact from fiction as we become more health conscious After studying this subject the student would be able to fully understand the concept of Food and Nutrition He or she would gain awareness regarding the common health issues in the society and will have clarity on the special requirements of food during an illness **The American Food Journal** ,1924

World's Work ,1904 Women and Stress James Harry Humphrey,2004 Stress has increasingly become associated with greater susceptibility to various illnesses The condition is also costly from an economic and financial perspective but such costs hardly reflect the human costs of emotional trauma and physical suffering that result from the illness Women today are in a situation where both the monetary and human effects of stress take their toll as women face unprecedented pressures in accommodating the demands of home and career and personal family stresses that often result In addition to this while women are prone to the same stressors as men they are confronted with potentially unique physical and psychological stressors of their own They may also become stress carriers as in the abusive husband and unfair boss relationship Ironically despite these differences women live longer than men although collectively they are reported to have more symptoms illnesses intake of drugs and doctor hospital visits This outstanding new book by a pioneer in stress research presents an essential analysis of this increasingly relevant subject The Eclectic Medical Journal ,1903 **Experiments on the Metabolism of Matter and Energy in the Human Body, 1898-1900** Wilbur Olin Atwater,1902 And results of the experiments pp 125 Human Values and Professional Ethics Gogate S.B.,2011 Human Values and Professional Ethics fulfils this noble intention by providing thought provoking inputs The reader will be compelled to delve deeper into his own consciousness and explore values that will benefit him and the society It will also help the reader to develop a holistic perspective towards life The book explains the essential complementarities between values and skills to ensure sustained

happiness prosperity The most delicate issues pertaining to the subject have been discussed in simple language with adequate scientific logical and practical explanations Although this book is specially designed for the engineering students of GBTU the value inputs contained herein will be equally to all educational disciplines
