Digital Bank Chris Skinner, Head of Department for Public Relations Chris Skinner, 2013-08-28 Becoming a Digital Bank is the challenge for all banks as customers demand new services focused upon 21st century technologies. The challenge is that most bank systems are stuck in the last century. None of this is easy and changing the bank's core systems to become a truly Digital Bank is the hardest challenge of all. This is because the reinvention of last century technologies to new platforms with total reliability, security and resilience is a stretch for everyone. It makes it hard for traditional banks to compete in this new space and allows many new and nimble firms to enter the banking markets and steal market share by exploiting new technologies specifically the mobile internet. In this new age of the mobile internet where cloud computing allows anyone to scale from small to big data and back again we are all wondering how to evolve our businesses to this new model of servicing and processing. In fact many of us are wondering what the new model of banking will be. What does it all mean how do shape the vision who are the

people providing leadership and where can you find out more This book tries to answer all of these questions with one of the markets leading practitioners providing insights case studies knowledge and opinion in order to show the way forward and is based upon the extensive writing of Chris Skinner Digital Bank not only includes extensive guidance and background on the digital revolution in banking but also in depth analysis of the activities of incumbent banks such as Barclays and new start ups such as Metro Bank in the UK as well as disruptive new models of banking such as Alior Bank in Poland and FIDOR Bank in Germany Add on to these a comprehensive sprinkling of completely new models of finance such as Zopa and Bitcoin and you can see that this book is a must have for anyone involved in the future of business commerce and banking
