Digital Critical Editions:

Digital Critical Editions Daniel Apollon, Claire Belisle, Philippe Regnier, 2014-07-15 Provocative yet sober Digital Critical Editions examines how transitioning from print to a digital milieu deeply affects how scholars deal with the work of editing critical texts On one hand forces like changing technology and evolving reader expectations lead to the development of specific editorial products while on the other hand they threaten traditional forms of knowledge and methods of textual scholarship Using the experiences of philologists text critics text encoders scientific editors and media analysts Digital Critical Editions ranges from philology in ancient Alexandria to the vision of user supported online critical editing from peer directed texts distributed to a few to community edited products shaped by the many The authors discuss the production and accessibility of documents the emergence of tools used in scholarly work new editing regimes and how the readers expectations evolve as they navigate digital texts The goal exploring questions such as What kind of text is produced Why is it produced in this particular way Digital Critical Editions provides digital editors researchers readers and technological actors with insights for addressing disruptions that arise from the clash of traditional and digital cultures while also offering a practical roadmap for processing traditional texts and collections with today's state of the art editing and research techniques thus addressing readers new emerging reading habits Scholarly Digital Editions as Interfaces Roman Bleier, Martina Bürgermeister, Helmut W. Klug, Frederike Neuber, Gerlinde Schneider, 2018-11-15 Interfaces are important elements of digital scholarly editions as they allow and direct the interaction of users with the online content and they facilitate the access to and exchange of data and information Some interfaces are created for the human user GUI others for machine interaction and data exchange API Both aspects of interfaces and their roles in digital scholarly editing were discussed at a conference in 2016 organised by the Centre for Information Modelling at the University of Graz and the Digital Scholarly Editions Initial Training Network DiXiT This volume includes a range of papers presented at the conference that highlight the diverse views and approaches towards interfaces in the digital scholarly editing community **Text Editing, Print and the Digital World** Kathryn Sutherland, Marilyn Deegan, 2016-04-01 Traditional critical editing defined by the paper and print limitations of the book is now considered by many to be inadequate for the expression and interpretation of complex works of literature At the same time digital developments are permitting us to extend the range of text objects we can reproduce and investigate critically not just books but newspapers draft manuscripts and inscriptions on stone Some exponents of the benefits of new information technologies argue that in future all editions should be produced in digital or online form By contrast others point to the fact that print after more than five hundred years of development continues to set the agenda for how we think about text even in its non print forms This important book brings together leading textual critics scholarly editors technical specialists and publishers to discuss whether and how existing paradigms for developing and using critical editions are changing to reflect the increased commitment to and assumed significance of digital tools and

methodologies **Digital Papyrology III** Nicola Reggiani, 2024-12-16 In the ever growing and evolving field of Digital Papyrology intending both the set of electronic tools for papyrological research and a new way of representing our knowledge of the Greek papyri in digital environments a focal current issue is the digital critical edition of the papyrus texts Since new perspectives are emerging involving co occurring phenomena like the scribal writing act the materiality of the writing medium the linguistic background which affect our global comprehension of the papyri beyond the traditional dichotomy text context scholars are increasingly feeling the limits of the printed editions and of their simple digital reproductions Several projects are proposing new looks at the papyri as cultural artefacts implementing annotation layers adding valuable information to the very texts They mostly deal with linguistics palaeography documentary typology paging layout material features and attempt to integrate the traditional editorial platform Papyri info with new data clusters or even new editorial platforms The volume investigates and discusses such new trends with the final goal of outlining the digital critical edition of the Greek papyri as an interconnected network of information Digital Papyrology II Nicola

Reggiani, 2018-05-07 The ongoing digitisation of the literary papyri and related technical texts like the medical papyri is leading to new thoughts on the concept and shape of the digital critical edition of ancient documents First of all there is the need of representing any textual and paratextual feature as much as possible and of encoding them in a semantic markup that is very different from a traditional critical edition based on the mere display of information Moreover several new tools allow us to reconsider not only the linguistic dimension of the ancient texts from exploiting the potentialities of linguistic annotation to a full consideration of language variation as a key to socio cultural analysis but also the very concept of philological variation replacing the mono authorial view of an reconstructed archetype with a dynamic multitextual model closer to the fluid aspect of the textual transmission The contributors experts in the application of digital strategies to the papyrological research face these issues from their own viewpoints not without glimpses on parallel fields like Egyptology and Near Eastern studies The result is a new original and cross disciplinary overview of a key issue in the digital humanities

Digital Papyrology I Nicola Reggiani, 2017-09-11 Since the very beginnings of the digital humanities Papyrology has been in the vanguard of the application of information technologies to its own scientific purposes for both theoretical and practical reasons the strong awareness towards the problems of human memory and the material ways of preserving it the need to work with a multifarious and overwhelming amount of different data After more than thirty years of development we have now at our disposal the most advanced tools to make papyrological studies more and more effective and even to create a new conception of papyrology and a new model of edition of the ancient documents At this turning point it is important to build an epistemological framework including all the different expressions of Digital Papyrology to trace a historical sketch setting the background of the contemporary tools and to provide a clear overview of the current theoretical and technological trends so that all the possibilities currently available can be exploited following

Critical Digital Humanities James E Dobson, 2019-03-16 Can established humanities methods coexist with computational thinking It is one of the major questions in humanities research today as scholars increasingly adopt sophisticated data science for their work James E Dobson explores the opportunities and complications faced by humanists in this new era Though the study and interpretation of texts alongside sophisticated computational tools can serve scholarship these methods cannot replace existing frameworks As Dobson shows ideas of scientific validity cannot easily nor should be adapted for humanities research because digital humanities unlike science lack a leading edge horizon charting the frontiers of inquiry Instead the methods of digital humanities require a constant rereading At the same time suspicious and critical readings of digital methodologies make it unwise for scholars to defer to computational methods Humanists must examine the tools including the assumptions that went into the codes and algorithms and questions surrounding their own use of digital technology in research Insightful and forward thinking Critical Digital Humanities lays out a new path of humanistic inquiry that merges critical theory and computational science

professionals linguists and enthusiasts of history and antiquity Handbook of Stemmatology Philipp Roelli, 2020-09-07

Stemmatology studies aspects of textual criticism that use genealogical methods to analyse a set of copies of a text whose autograph has been lost This handbook is the first to cover the entire field encompassing both theoretical and practical aspects of traditional as well as modern digital methods and their history As an art ars stemmatology's main goal is editing and thus presenting to the reader a historical text in the most satisfactory way As a more abstract discipline scientia it is interested in the general principles of how texts change in the process of being copied Thirty eight experts from all of the fields involved have joined forces to write this handbook whose eight chapters cover material aspects of text traditions the genesis and methods of traditional Lachmannian textual criticism and the objections raised against it as well as modern digital methods used in the field The two concluding chapters take a closer look at how this approach towards texts and textual criticism has developed in some disciplines of textual scholarship and compare methods used in other fields that deal with descent with modification The handbook thus serves as an introduction to this interdisciplinary field
