Digital Storytelling: Pädagogik und Therapie für medial sozialisierte Menschen Christian Dorn, 2015-05-15

Medial sozialisierte Menschen denken fühlen und verhalten sich anders als ihre noch prädigital sozialisierten Eltern. Sie stellen andere Ansprüche und benötigen eine andere Art der Zuwendung sowohl in der Pädagogik als auch im Rahmen therapeutischer Interventionen. Das Digital Storytelling, wie ich es verstehe und praktiziere, stellt eine Art der Zuwendung dar, die medial sozialisierten Menschen, insbesondere Kinder und Jugendlichen, gerecht wird. Mein Vorschlag integriert sowohl eine pädagogische als auch eine therapeutische Komponente. Mit Hilfe dieser Methode, bei der aus alltäglichen oder eben nicht alltäglichen Erlebnissen kleine Videogeschichten werden sollen, kann erreicht werden, dass in der Medialität vermittelte Lebenskonzepte und daraus resultierende oft schädliche oder belastende Verhaltensweisen hinterfragt, relativiert und ggf. verändert werden können und zum anderen, dass Wissen auf eine für medial sozialisierte Menschen entsprechende Art und Weise vermittelt werden kann. Psychoedukation: Die PatientInnen werden so in die Lage versetzt, ihrer erlebten Erinnerung ihrer biografischen Geschichte im soziokulturellen Kontext und in Bezug zum jeweiligen Thema Ausdruck zu verleihen, somit Bedürfnisse, aber auch Befindlichkeiten bildlich und sprachlich zu artikulieren und damit eine Veränderung ihrer oftmals problematischen Situation herbeiführen. Und folgende Methoden lassen sich für medial sozialisierte Menschen in ihrer Wirkung mit Hilfe des Digital Storytelling deutlich intensivieren: Lernungsorientierte Kurzberatung nach deShazer, Soziotherapie, Biografiearbeit, Expressives Schreiben.

Digital Stories and Their Integration in Early Childhood and Primary Education Jim Prentzas, 2016. This book is an edited collection of chapters regarding the integration of digital stories in the classroom, focusing on early childhood and primary education. Storytelling has always been an effective way of teaching all ranges of subjects at all educational levels, especially in early childhood and primary education. Digital storytelling combines the advantages of storytelling and digital tools. Digital stories attract the interest of students and provide them with motives to take part in learning activities in collaboration with their classmates and teachers. They have become a popular resource of Information and Communications Technology (ICT). Digital stories can be a valuable tool to educators. However, as is the case with many ICT resources, teachers need practical ideas about how to integrate them in teaching and learning. This book covers a gap in the international bibliography regarding digital storytelling. It discusses teaching scenarios that exploit digital stories in a wide range of subjects in early childhood and primary education. Subjects covered in teaching scenarios discussed in this book include language, time, concepts, music, poetry, social tolerance in multicultural societies, mathematics, environmental issues, foreign language learning, healthy nutrition, mythology, and geography. Such a diversity of issues concerning integration of digital stories in early childhood and primary education has not been dealt with in other published books until now. The discussed teaching scenarios involve two and three dimensional digital stories implemented with the visual programming tools Scratch and Alice. Scratch is implemented by the Massachusetts Institute of Technology (MIT) and

enables the creation of two dimensional multimedia applications Alice is implemented by Carnegie Mellon and enables the creation of three dimensional multimedia applications Both of these tools are available at no charge and are popular in education throughout the world The created digital stories have been combined with self assessment e activities created with JCLic to provide further advantages to students JCLic is a free software tool implemented in Spain that enables the creation of interactive assessment activities addressed to early childhood and elementary education The book is organised into three main parts and consists of ten chapters The first part consists of two chapters discussing general background issues concerning storytelling ICT and digital storytelling in education The second part consists of four chapters discussing teaching scenarios involving early childhood education The third part consists of four chapters discussing teaching scenarios regarding primary education
