**Perspectives in Psychology** Ronald S. Valle, Steen Halling, 2013-03-08 When I began to study psychology a half century ago it was defined as the study of behavior and experience By the time I completed my doctorate shortly after the end of World War II the last two words were fading rapidly In one of my first graduate classes a course in statistics the professor announced on the first day Whatever exists exists in some number We dutifully wrote that into our notes and did not pause to recognize that thereby all that makes life meaningful was being consigned to oblivion This bland restructuring perhaps more accurately destruction of the world was typical of its time 1940 The influence of a narrow scientific attitude was already spreading throughout the learned disciplines In the next two decades it would invade and tyrannize the social sciences education and even philosophy To be sure quantification is a powerful tool selectively employed but too often it has been made into an executioner's axe to deny actuality to all that does not yield to its procrustean demands *The Four Domains of Mental Illness* Rene J. **Dark Affinities, Dark Imaginaries** Joseph Natoli, 2016-11-17 Uniting personal history with cultural history Dark Affinities Dark Imaginaries tells a story of a mind a time and a culture The vehicle or medium of this excursion is an overview and sampling of the author's work and what is revealed are cautionary tales of a once aspiring egalitarian democracy confronted with plutocracy's gentrification of analog history and off line life superseded by a rush toward virtualized robotic AI transformation of the human life world of everything social and public giving way to everything personal and opinionated The vagaries of a lifetime of paths taken are woven together by a narrative that reveals in every piece a significance that was only partially present at its initial writing Thus the reader becomes involved in a developing story of a certain personal psyche working toward understanding its own development within a changing American culture Sometimes angry sometimes joyful but always curious and wry Joseph Natoli crosses the boundary lines of psychology politics literature philosophy education and economics to show how we bring ourselves and our cultural imaginaries simultaneously into being through the processes and pleasures of thinking beyond the confines of the personal

**Doing Psychiatry Wrong** René J. Muller, 2013-03-01 The prospect that the psychiatric profession has hurt rather than helped many of its patients is incredibly disheartening however wrong diagnoses and improper treatment are all too common errors within the field Author Ren Muller presents a revealing look into how psychiatry has failed a great majority of patients all the while recognizing the valiant efforts made by psychiatrists who maintain their integrity and serve their patients well The result is an enlightening critique of the profession one that pits criticism of psychiatry's current biological reduction and exaggerated promises against the accumulated wisdom of a profession that has struggled for a century and a half to understand and help those with mental illness

growing area     Medicine, Health and Being Human Lesa Scholl,2018-05-11 Medicine Health and Being Human begins a conversation to explore how the medical has defined us that is the ways in which perspectives of medicine and health have affected cultural understandings of what it means to be human With chapters that span from the early modern period through to the contemporary world and are drawn from a range of disciplines this volume holds that incremental historical and cultural influences have brought about an understanding of humanity in which the medical is ingrained consciously or unconsciously usually as a mode of legitimisation Divided into three parts the book follows a narrative path from the integrity of the human soul through to the integrity of the material human body then finally brought together through engaging with end of life responses Part 1 examines the move from spirituality to psychiatry in terms of the way medical science has influenced cultural understandings of the mind Part 2 interrogates the role that medicine has played in the nineteenth and twentieth centuries in constructing and deconstructing the self and other including the fusion of visual objectivity and the scientific gaze in constructing perceptions of humanity Part 3 looks at the limits of medicine when the integrity of one body breaks down It contends with the ultimate question of the extent to which humanity is confined within the integrity of the human body and how medicine and the humanities work together toward responding to the finality of death This is a valuable contribution for all those interested in the medical humanities history of medicine history of ideas and the social approaches to health and illness     Strangers in a Familiar Land James A. Blumenstock,2020-04-28 Throughout history many Christians have existed on the margins of society deviants and strangers in lands they call home To survive they have had to construct alternate identities that not only make sense of their religious experiences and beliefs but also equip them to successfully negotiate their social worlds In Thailand a nation where social identities are thoroughly intertwined with Buddhist religious adherence Christians must come to terms with such a marginalized existence By leaving Buddhism and adopting what is considered a foreign faith Christian converts become deviants to normal Thai identity and belonging In response they have discovered creative solutions for traversing this complex terrain of marginalization This book presents a deep exploration of the phenomenon of marginalization as experienced by Thai Christian converts In it readers will follow participants through the heights of transformative religious experience the lows of severe social displacement the tensions of managing two disparate lifeworlds and two conflicting selves and the comfort and joy of finding a new place to call home In the end the reader will gain deep insight into what it is like to successfully navigate a minority religious identity on the margins of society

sense of vividness often lacking in academic discourse this is living philosophy
