staff     Document Analysis Systems: Theory and Practice Seong-Whan Lee, Yasuaki Nakano, 2003-07-31 Recently there has been an increased interest in the research and development of techniques for components of complete document analysis systems. In recognition of this trend a series of workshops on Document Analysis Systems commenced in 1994 under the leadership of Henry Baird. The first workshop held in Kaiserslautern, Germany, in October 1994 was chaired by Andreas Dengel and Larry Spitz. The second workshop on Document Analysis Systems was held in Malvern, PA, USA, in October 1996, chaired by Jonathan J. Hull and Suzanne Liebowitz Taylor. The DAS workshop has been one of the most prestigious technical meetings bringing together a large number of scientists and engineers from all over the world to express their innovative ideas and report on their latest achievements in the area of document analysis systems. The papers in this special book edition were rigorously selected from the Third IAPR Workshop on Document Analysis Systems DAS 98 held in Nagano, Japan, on 4-6 November 1998. It is worth mentioning that the papers were chosen for their original and substantial contributions to the workshop theme and this special book edition. From among the 53 papers that were presented by authors from 11 countries at the DAS 98, after critical reviews by at least three experts, we carefully selected 29 papers for this special book edition. Most of the contributions in this edition have been expanded or extensively revised to include helpful discussions, suggestions or comments made during the workshop.

**The Critical Practice of Film** Elspeth Kydd, 2017-09-16 The Critical Practice of Film introduces film studies and production through the integration of criticism theory and practice. Its approach is that of critical practice, a process that explores the integration and intersection between the critical analysis of films and the practical aspects of filmmaking. In other words, this book is both an introduction to the ways in which we watch films as well as an introduction to how films are created. The more you know about how films are made, the more you can appreciate the artistry involved in a film. Author Elspeth Kydd combines explorations of basic technical and aesthetic principles with extended analyses drawn from both classic and contemporary Hollywood and other world cinemas, including *Battleship Potemkin* (1927), *Un Chien Andalou* (1929), *Stagecoach* (1939), *Mildred Pierce* (1945), *Notorious* (1946), *Letter from an Unknown Woman* (1948), *Gentlemen Prefer Blondes* (1953), *Breathless* (1959), *Memories of Underdevelopment* (1968), *Star Wars* (1977), *Raiders of the Lost Ark* (1981), *Distant Voices, Still Lives* (1988), *The Matrix* (1999), *Amores Perros* (2000), *Gosford Park* (2001), and *The Lord of the Rings* trilogy (2001-3). Also included is a range of exercises designed to stimulate critical and analytical thought and help to demystify the process of creative mediaproduction. Assignments range in scale from simple storyboarding and narrative development exercises that may be explored with minimal technology to more complex video projects that can be adapted to suit varying levels of technical skill. The Critical Practice of Film provides an accessible introduction to the theory and practice of film studies, integrating creative practice with critical and theoretical engagement to guide students towards an engaged form of creative expression and an active role as reviewer and critic. Beautifully presented, this ground-breaking text offers all students an integrated understanding of film criticism and production. Elspeth Kydd is a Senior
