A Modernist's Critique Pasquale De Marco, 2025-08-12 A Modernist's Critique is a powerful and provocative book that explores the crisis of culture in the modern world Drawing on a wide range of sources from philosophy and literature to art and politics Pasquale De Marco argues that we are facing a loss of authority a sense of community and a shared sense of reality This crisis is particularly acute in the realm of literature Once considered a bastion of truth and beauty literature is now under attack from postmodernism and deconstruction These movements have led to a loss of faith in the objectivity of truth and the value of reason As a result literature is increasingly seen as a mere plaything devoid of any real meaning or significance Pasquale De Marco argues that this crisis of culture is not inevitable It is the result of a series of choices that we have made as a society We have chosen to prioritize individualism over community image over substance and the cult of the individual over the common good But it is not too late to change course We can still choose to rebuild a culture that is based on truth beauty and goodness We can still choose to create a world in which literature is valued and respected A Modernist's Critique is a call to action It is a call to defend the importance of culture in our lives It is a call to reclaim the power of literature to change our world In this book Pasquale De Marco offers a powerful and persuasive argument for the importance of culture in our lives He shows how culture can help us to make sense of the world to connect with others and to live meaningful lives A Modernist's Critique is a must read for anyone who cares about the future of culture It is a book that will challenge your assumptions and change the way you think about the world If you like this book write a review

Postprint N. Katherine Hayles, 2021-02-16 Since Gutenberg's time every aspect of print has gradually changed. But the advent of computational media has exponentially increased the pace, transforming how books are composed, designed, edited, typeset, distributed, sold, and read. N. Katherine Hayles traces the emergence of what she identifies as the postprint condition, exploring how the interweaving of print and digital technologies has changed not only books but also language, authorship, and what it means to be human. Hayles considers the ways in which print has been enmeshed in literate societies and how these are changing as some of the cognitive tasks once performed exclusively by humans are now carried out by computational media. Interpretations and meaning-making practices circulate through transindividual collectivities created by interconnections between humans and computational media, which Hayles calls cognitive assemblages. Her theoretical framework conceptualizes innovations in print technology as redistributions of cognitive capabilities between humans and machines. Humanity is becoming computational, just as computational systems are edging toward processes once thought of as distinctively human. Books in all their diversity are also in the process of becoming computational, representing a crucial site of ongoing cognitive transformations. Hayles details the consequences for the humanities through interviews with scholars and university press professionals and considers the cultural implications in readings of two novels, *The Silent History* and *The Word Exchange*, that explore the postprint condition. Spanning fields including book studies, cultural theory, and media archaeology, *Postprint* is a strikingly original consideration of the role of computational media in the ongoing evolution of humanity.
