Portico University of Michigan. College of Architecture and Urban Planning, 2003 *MediaCities: Proceedings* Jordan Geiger, Mark Shepard, Omar Khan, 2014-02-09 Proceedings from MediaCity 4 MediaCities the International Conference Workshops and Exhibition mounted at the University at Buffalo May 3 5 2013 Edited by Jordan Geiger Mark Shepard and Omar Khan *Human-Computer Interaction - INTERACT 2009* Tom Gross, Jan Gulliksen, Paula Kotzé, Lars Oestreicher, Philippe Palanque, Raquel Oliveira Prates, Marco Winckler, 2009-08-06 INTERACT 2009 was the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on Human Computer Interaction This year INTERACT was held in Uppsala Sweden organized by the Swedish Interdisciplinary Interest Group for Human Computer Interaction STIMDI in cooperation with the Department of Information Technology at Uppsala University Like its predecessors INTERACT 2009 highlighted both to the academic and to the industrial world the importance of the human computer interaction HCI area and its most recent breakthroughs on current applications Both experienced HCI researchers and professionals as well as newcomers to the HCI field interested in designing or evaluating interactive software developing new interaction technologies or investigating overarching theories of HCI found in INTERACT 2009 a great forum for communication with people of similar interests to encourage collaboration and to learn INTERACT 2009 had Research and Practice as its special theme The reason we selected this theme is that the research within the field has drifted away from the practical applicability of its results and that the HCI practice has come to disregard the knowledge and development within the academic community *Architecture and Interaction* Nicholas S. Dalton, Holger Schnädelbach, Mikael Wiberg, Tasos Varoudis, 2016-06-09 Ubiquitous computing has a vision of information and interaction being embedded in the world around us this forms the basis of this book Built environments are subjects of design and architects have seen digital elements incorporated into the fabric of buildings as a way of creating environments that meet the dynamic challenges of future habitation Methods for prototyping interactive buildings are discussed and the theoretical overlaps between both domains are explored Topics like the role of space and technology within the workplace as well as the role of embodiment in understanding how buildings and technology can influence action are discussed as well as investigating the creation of place with new methodologies to investigate the occupation of buildings and how they can be used to understand spatial technologies Architecture and Interaction is aimed at researchers and practitioners in the field of computing who want to gain a greater insight into the challenges of creating technologies in the built environment and those from the architectural and urban design disciplines who wish to incorporate digital information technologies in future buildings

Understanding Context Andrew Hinton,2014-12-02 To make sense of the world we re always trying to place things in context whether our environment is physical cultural or something else altogether Now that we live among digital always networked products apps and places context is more complicated than ever starting with where and who we are This practical insightful book provides a powerful toolset to help information architects UX professionals and web and app designers understand and solve the many challenges of contextual ambiguity in the products and services they create You ll discover not only how to design for a given context but also how design participates in making context Learn how people perceive context when touching and navigating digital environments See how labels relationships and rules work as building blocks for context Find out how to make better sense of cross channel multi device products or services Discover how language creates infrastructure in organizations software and the Internet of Things Learn models for figuring out the contextual angles of any user experience

Digital and Smart Cities Katharine Willis,Alessandro Aurigi,2017-10-12 Digital and Smart Cities presents an overview of how technologies shape our cities There is a growing awareness in the fields of design and architecture of the need to address the way that technology affects the urban condition This book aims to give an informative and definitive overview of the topic of digital and smart cities It explores the topic from a range of different perspectives both theoretical and historical and through a range of case studies of digital cities around the world The approach taken by the authors is to view the city as a socially constructed set of activities practices and organisations This enables the discussion to open up a more holistic and citizen centred understanding of how technology shapes urban change through the way it is imagined used implemented and developed in a societal context By drawing together a range of currently quite disparate discussions the aim is to enable the reader to take their own critical position within the topic The book starts out with definitions and sets out the various interpretations and aspects of what constitutes and defines digital cities The text then investigates and considers the range of factors that shape the characteristics of digital cities and draws together different disciplinary perspectives into a coherent discussion The consideration of the different dimensions of the digital city is backed up with a series of relevant case studies of global city contexts in order to frame the discussion with real world examples

Place-Based Spaces for Networked Learning Lucila Carvalho,Peter Goodyear,Maarten de Laat,2016-07-01 With the boundaries of place softened and extended by digital communications technologies learning in a networked society necessitates new distributions of activity across time space media and people and this development is no longer exclusive to formally designated spaces such as school classrooms lecture halls or research laboratories Place based Spaces for Networked Learning explores how qualities of physical places make both formal and informal education in a networked society possible Through a series of investigations and case studies it illuminates the structural composition and functioning of complex learning environments This book offers a wealth of key design elements and attributes for productive learning that educational designers can reuse in multiple contexts The chapters examine how places are modified expanded

or supplemented by networking technologies and practices in order to create spaces in which learners can collaboratively develop new understandings connections and capabilities Utilizing a range of diverse but complementary perspectives from anthropology archaeology architecture geography psychology sociology and urban studies Place based Spaces for Networked Learning addresses how material places and digital spaces are understood how sense can be made of new assemblages and configurations of tasks tools and people how the real time analysis of new flows of data can inform and entertain users of a space and how access to the digital realm changes our experiences with both places and other people **A Companion to**

Willis, 2017-05-15 The focus of this book is on understanding and explaining the way that our increasingly networked world impacts on the legibility of cities that is how we experience and inhabit urban space It reflects on the nature of the spatial effects of the networked and mediated world from mobile phones and satnavs to data centres and wifi nodes and discusses how these change the very nature of urban space It proposes that netspaces are the spaces that emerge at the interchange between the built world and the space of the network It aims to be a timely volume for both architectural urban design and media practitioners in understanding and working with the fundamental

changes in built space due to the ubiquity of networks and media This book argues that there needs to be a much better understanding of how networks affect the way we inhabit urban space The volume defines five characteristics of netspaces and defines in detail the way that the spatial form of the city is affected by changing practices of networked world It draws on theoretical approaches and contextualises the discussion with empirical case studies to illustrate the changes taking place in urban space This readable and engaging text will be a valuable resource for architects urban designers planners and sociologists for understanding how of networks and media are creating significant changes to urban space and the resulting implications for the design of cities Teaching Ecocriticism and Green Cultural Studies G. Garrard,2016-01-12

Understanding Creative Users of ICTs David Kurt Herold,Harmeet Sawhney,Leopoldina Fortunati,2013-09-13 The disjuncture between the design intent of the developers of ICTs and the needs of the users has often led to surprising use of new technologies as users have refused to become mere agents of the designers Individual users have adopted their own uses of ICTs based on the complex webs of relations and meanings in which they function as social actors Instead of adjusting these webs to new ICTs they have fit the ICTs into their pre existing social webs often resulting in imaginative and creative uses of new technologies not envisaged by the original designers The contributions in this volume provide studies of such integrations of ICTs into the lives of human users and demonstrate that such uses should not be regarded as faulty or mistaken merely because they fail to meet the expectations of the original designers of the ICTs Instead human users should be given precedence over ICTs and the creative uses of universal technologies by individual users should be emphasised and studied so as to move towards a better understanding and appreciation of the integration of ICTs into human lives This book was originally published as special issue of The Information Society
