Dilemmas Lectures Cambridge Philosophy Classics:

Dilemmas Gilbert Ryle, 2015-10-07 Common sense tells me I can control my life to some extent should I then faced with a logical argument for fatalism reject common sense There seems to be no place in a physical theory of the universe for the sensory experiences of colours taste and smells yet I know I have these experiences In this book Gilbert Ryle explores the conflicts that arise in everyday life and shows that the either or which such dilemmas seem to suggest is a false dilemma one side of the dilemma does not deny what we know to be true on the other side This classic book has been revived in a new series livery for twenty first century readers featuring a specially commissioned preface written by Barry Stroud

Knowledge at the Boundaries Nicholas Rescher, 2020-09-25 The book offers a reflection on the nature scope and limits of knowledge that have been at the focus of the author s work over decades The essays collected in this volume expound and extend these efforts in exploring the outer fringes of understanding the outer boundaries of conceivability the limits of cognition and the ramifications of ineffability and paradox They join in exploring the lay of the land at the boundaries of knowledge The first chapters address basic facts regarding the conceptualization of knowledge This is followed by a study on how to deal with problems relating to the affirmation and considerations of truth The final chapters scrutinize the limits of demonstration and the inherent impossibility of realizing an ideal systematization of our knowledge of totalities The book affords novel perspectives regarding the thought of a widely appreciated philosopher It is an original work aimed for readers interested in the theory of knowledge and philosophy of cognition **Faith after the Anthropocene** Matthew Wickman, Jacob Sherman, 2020-11-09 Recent decades have brought to light the staggering ubiquity of human activity upon Earth and the startling fragility of our planet and its life systems This is so momentous that many scientists and scholars now argue that we have left the relative climactic stability of the Holocene and have entered a new geological epoch known as the Anthropocene This emerging epoch may prompt us not only to reconsider our understanding of Earth systems but also to

reimagine ourselves and what it means to be human How does the Earth s precarious state reveal our own How does this vulnerable condition prompt new ways of thinking and being The essays that are part of this collection consider how the transformative thinking demanded by our vulnerability inspires us to reconceive our place in the cosmos alongside each other and potentially before God Who are we after the concept of the Anthropocene What forms of thought and structures of feeling might attend us in this state How might we determine our values and to what do we orient our hopes Faith a conceptual apparatus for engaging the unseen helps us weigh the implications of this massive but in some ways mysterious force on the lives we lead faith helps us visualize what it means to exist in this new and still emergent reality **Theology's**

Epistemological Dilemma Kevin Diller,2014-10-24 Karl Barth and Alvin Plantinga are not thought of as theological allies Barth is famous for his opposition to philosophy s role in theology while Plantinga is famous for his emphasis on warranted belief Kevin Diller argues that they actually offer a unified response to the central epistemological dilemma in theology

The Modern Dilemma Leon Surette,2008-06-19 Leon Surette s new study of T S Eliot and Wallace Stevens challenges the received view that Stevens poetry expresses a Humanist world view and more surprisingly documents Eliot s early Humanist phase **Cambridge University Reporter** University of Cambridge,1916 **The Ethics of Conceptualization**

Matthieu Queloz,2025-01-31 Philosophy strives to give us a firmer hold on our concepts But what about their hold on us Why place ourselves under the sway of a concept and grant it the authority to shape our thought and conduct Another conceptualization would carry different implications What makes one way of thinking better than another The Ethics of Conceptualization develops a framework for concept appraisal Its guiding idea is that to question the authority of concepts is to ask for reasons of a special kind reasons for concept use which tell us which concepts to adopt adhere to or abandon thereby shoring up or undercutting the reasons for action and belief that guide our deliberations Traditionally reasons for concept use have been sought either in timeless rational foundations or in concepts inherent virtues such as precision and consistency Against this the book advances two main claims that we find reasons for concept use in the conceptual needs we discover when we critically distance ourselves from a concept by viewing it from the autoethnographic stance and that sometimes concepts that conflict or exhibit other vices such as vagueness or superficiality are just what we need By considering which concepts we need rather than which are absolutely best we can reconcile ourselves to the contingency of our concepts determine the proper place of efforts to tidy up thought and adjudicate between competing conceptions of things even things as contested as liberty or free will A needs based approach separates helpful clarification from hobbling tidy mindedness and authoritative definition from conceptual gerrymandering This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations **Soul and Mind in Greek Thought. Psychological Issues**

in Plato and Aristotle Marcelo D. Boeri,Yasuhira Y. Kanayama,Jorge Mittelman,2018-06-06 This book offers new insights

into the workings of the human soul and the philosophical conception of the mind in Ancient Greece It collects essays that deal with different but interconnected aspects of that unified picture of our mental life shared by all Ancient philosophers who thought of the soul as an immaterial substance The papers present theoretical discussions on moral and psychological issues ranging from Socrates to Aristotle and beyond in connection with modern psychology Coverage includes moral learning and the fruitfulness of punishment human motivation emotions as psychic phenomena and more Some of these topics directly stemmed from the Socratic dialectical experience and its tragic outcome whereas others found their way through a complex history of refinements disputes and internal critique The contributors present the gradual unfolding of these central themes through a close inspection of the relevant Ancient texts They deliver a wide ranging survey of some central and mutually related topics In the process readers will learn new approaches to Platonic and Aristotelian psychology and action theory This book will appeal to graduate students and researchers in Ancient philosophy Any scholar with a general interest in the history of ideas will also find it a valuable resource

Historiography and the Formation of Philosophical Canons Sandra Lapointe, Erich H. Reck, 2023-06-16 This book presents a series of case studies and reflections on the historiographical assumptions methods and approaches that shape the way in which philosophers construct their own past The chapters in the volume advance discussion of the methods of historians of philosophy while at the same time illustrating the various ways in which philosophical canons come into existence debunking the myth of analytical philosophy's ahistoricism and providing a deeper understanding of the roles historiographical devices play in philosophical thought More importantly the contributors attempt to understand history of philosophy in connection with other historical and historiographical approaches contributors engage classical history of science sociology of knowledge history of psychology and historiography in dialogue with historiographical practices in philosophy more narrowly construed Additionally select chapters adopt a more diverse perspective by making place for non Western approaches and for efforts to construe new philosophical narratives that do justice to the voice of women across the centuries Historiography and the Formation of Philosophical Canons will be of interest to researchers and advanced students working in history of philosophy meta philosophy philosophy of history historiography intellectual history and sociology of knowledge
