Conference on Practical Applications of Computational Biology & Bioinformatics Miguel P. Rocha, Nicholas Luscombe, Florentino Fdez-Riverola, Juan M. Corchado Rodríguez, 2012-03-05 The growth in the Bioinformatics and Computational Biology fields over the last few years has been remarkable and the trend is to increase its pace In fact the need for computational techniques that can efficiently handle the huge amounts of data produced by the new experimental techniques in Biology is still increasing driven by new advances in Next Generation Sequencing several types of the so called omics data and image acquisition just to name a few The analysis of the datasets that produces and its integration call for new algorithms and approaches from fields such as Databases Statistics Data Mining Machine Learning Optimization Computer Science and Artificial Intelligence Within this scenario of increasing data availability Systems Biology has also been emerging as an alternative to the reductionist view that dominated biological research in the last decades Indeed Biology is more and more a science of information requiring tools from the computational sciences In the last few years we have seen the surge of a new generation of interdisciplinary scientists that have a strong background in the biological and computational sciences In this context the interaction of researchers from different scientific fields is more than ever of foremost importance boosting the research efforts in the field and contributing to the education of a new generation of Bioinformatics scientists PACBB 12 hopes to contribute to this effort promoting this fruitful interaction PACBB 12 technical program included 32 papers from a submission pool of 61 papers spanning many different sub fields in Bioinformatics and Computational Biology Therefore the conference will certainly have promoted the interaction of scientists from diverse

research groups and with a distinct background computer scientists mathematicians biologists The scientific content will certainly be challenging and will promote the improvement of the work that is being developed by each of the participants
