Handbook of the Economics of Art and Culture Victor A. Ginsburgh,David Throsby,2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward acquiring art Examines the effect of art on economies of developed and developing countries around the world Chokepoint Capitalism Cory Doctorow,Rebecca Giblin,2022-09-27 A call to action for the creative class and labor movement to rally against the power of Big Tech and Big Media Corporate concentration has breached the stratosphere as have corporate profits An ever expanding constellation of industries are now monopolies where sellers have excessive power over buyers or monopsonies where buyers hold the whip hand over sellers or both In Chokepoint Capitalism scholar Rebecca Giblin and writer and activist Cory Doctorow argue we re in a new era of chokepoint capitalism with exploitative businesses creating insurmountable barriers to competition that enable them to capture value that should rightfully go to others All workers are weakened by this but the problem is especially well illustrated by the plight of creative workers From Amazon s use of digital rights management and

bundling to radically change the economics of book publishing to Google and Facebook's siphoning away of ad revenues from news media and the Big Three record labels use of inordinately long contracts to up their own margins at the cost of artists' chokepoints are everywhere. By analyzing book publishing and news, live music and music streaming, screenwriting, radio and more, Giblin and Doctorow deftly show how powerful corporations construct anti-competitive flywheels designed to lock in users and suppliers, make their markets hostile to new entrants and then force workers and suppliers to accept unfairly low prices. In the book's second half, Giblin and Doctorow then explain how to batter through those chokepoints with tools ranging from transparency rights to collective action and ownership, radical interoperability, contract terminations, job guarantees and minimum wages for creative work. Chokepoint Capitalism is a call to workers of all sectors to unite to help smash these chokepoints and take back the power and profit that's being heisted away before it's too late.

Making data portability more effective for the digital economy Jan Krämer, Pierre Senellart, Alexandre de Streel, 2020-06-15. This study provides recommendations on how to make personal data portability more effective. This will truly empower consumers to use the services they want and share their data with whoever they wish and stimulate innovation in Europe. With the entry into force of the GDPR, European citizens gained new rights, notably with data portability. But two years later, there is still little sign of people exercising this right and of companies offering an easy and convenient service for data portability. While the European Commission is finalising its evaluation of the GDPR and closes its consultation on the European data strategy, the authors, professors Jan Krämer, Pierre Senellart and Alexandre de Streel, warn that the current legal framework requires clarifications to better empower European citizens in a data-driven society. In this study, they identify barriers to data portability, including the lack of possibilities to import data as well as the lack of common standards and tools to access data as easy as the click of a button. The ability to provide users with a centralised dashboard for monitoring and controlling the flow of their data is also critically missing. Today, consumers do not widely use data portability for reasons that can and should be overcome. Making data portability more effective is better for competition, for innovation and to empower users, stress the authors. There should be no second-guessing on whether to make data portability more effective; the time to act is now. The current EU framework encourages data portability, but there are legal gaps that the EU should fill. The authors insist on the need for detailed guidance on how data portability can be facilitated and on which data is subject to data portability without violating privacy rights. They advocate that data provided by users when using a service, such as search history, i.e. observed data, should clearly be included under the scope of data portability. The authors consider it essential that the obligation to offer standardised Application Programming Interfaces (APIs) be much more

widespread to enable consumers to continuously port their data We believe that standardised APIs that enable continuous data portability is a prerequisite for encouraging more organisations to import personal data and for encouraging more consumers to initiate such transfers explain the authors Projects such as the Data Transfer Project have highlighted that continuous data portability is technically feasible The authors argue that Personal Management Information Systems PIMs facilitate the complex consent management and offer users a centralised dashboard for monitoring and controlling the flow of their data will have a crucial role to play for the wider adoption of data portability It must be as easy as clicking a button for consumers to continuously share data they created with one provider to another provider This may also require educating and informing users on their rights through information campaigns alongside clear policy measures explain the authors Nevertheless they stress that PIMs are not likely to find a sustainable business model and thus policy makers should support the emergence of open source projects by setting common standards for data transfers consent management and identity management
