Zeran v. America Online Ebook Eric Goldman, Jeff Kosseff, 2020-09-09 The Fourth Circuit's 1997 ruling in *Zeran v. America Online* played a critical role in Section 230 jurisprudence and by extension the Internet's development. To better understand this seminal case, we compiled a variety of resources about the case, including 12 essays reflecting upon the decision's 20th anniversary and 2 key opinions and filings from the litigation, some of which have never before been available in electronic format. This compilation should interest anyone researching the history of Internet Law or thinking about the implications of online speech policies and the ongoing policy debates about Section 230. IP, Big Data, and Society (Entering the Shift Age, eBook 10) David Houle, 2012-12-05 We are leaving the Information Age and transitioning into the Shift Age, a time of transformation and change that offers both great risk and incredible opportunity. In *Entering the Shift Age*, David Houle identifies and explains the dynamics and forces that have shaped our world and will continue to reshape our world for the next 20 years. He shows how the Shift Age means a world fully global yet focused on the individual, where the speed of change is so fast that change itself is the new norm. He also comments from the front lines of the Shift Age on issues and topics that affect our lives, from business and technology to environment, media, and global culture. eBook 10 covers Intellectual Property, the new wealth of the Shift Age, and how the Era of Big Data will change the ways in which we perceive ourselves and what we do during the next 20 years. Part 4: The Future of the Shift Age. Introduction. Chapter 22: IP is the Wealth of the Shift Age. Chapter 23: The Era of Big Data. Chapter 24: Society and Economics. Ebook: Business Driven Information Systems Paige Baltzan, Amy Phillips, 2014-10-16 *Business Driven Information Systems 4e* discusses various business initiatives first and how technology supports those initiatives second. The premise for this unique approach is that business initiatives should drive technology choices. Every discussion first addresses the business needs and then addresses the technology that supports those needs. This updated edition provides the foundation that will enable students to achieve excellence in business through its updated case studies, closing cases, technology plug-ins, expanded IT topics, and new project management content. *Business Driven Information Systems* is designed to give students the ability to understand how information technology can be a point of strength for an organization and McGraw Hill's online learning and assessment solution Connect MIS helps students apply this knowledge. **Noise Reduction in Speech Processing** Jacob Benesty, Jingdong Chen, Yiteng Huang, Israel Cohen, 2009-04-28 Noise is everywhere and in most applications that are related to audio and speech, such as human-machine interfaces, hands-free communications, voice over IP (VoIP), hearing aids, teleconferencing, telepresence, telecollaboration systems, and so many others, the signal of interest, usually speech, that is picked up by a microphone is generally contaminated by noise. As a result, the microphone signal has to be cleaned up with digital signal processing tools before it is stored, analyzed, transmitted, or played out. This cleaning process is often called noise reduction, and this topic has attracted a considerable amount of research and engineering attention for several decades.

One of the objectives of this book is to present in a common framework an overview of the state of the art of noise reduction algorithms in the single channel one microphone case The focus is on the most useful approaches i e filtering techniques in different domains and spectral enhancement methods The other objective of Noise Reduction in Speech Processing is to derive all these well known techniques in a rigorous way and prove many fundamental and intuitive results often taken for granted This book is especially written for graduate students and research engineers who work on noise reduction for speech and audio applications and want to understand the subtle mechanisms behind each approach Many new and interesting concepts are presented in this text that we hope the readers will find useful and inspiring
