Ebook Engaging Senses Object Based Learning Education:

Engaging the Senses: Object-Based Learning in Higher Education Dr Helen J Chatterjee, Dr Leonie Hannan, 2015-11-28

The use of museum collections as a path to learning for university students is fast becoming a new pedagogy for higher education. Despite a strong tradition of using lectures as a way of delivering the curriculum, the positive benefits of active and experiential learning are being recognised in universities at both a strategic level and in daily teaching practice. As museum artefacts, specimens and art works are used to evoke, provoke and challenge students' engagement with their subject, so transformational learning can take place. This unique book presents the first comprehensive exploration of object-based learning as a pedagogy for higher education in a broad context. An international group of authors offer a spectrum of approaches at work in higher education today. They explore contemporary principles and practice of object-based learning in higher education, demonstrating the value of using collections in this context and considering the relationship between academic discipline and object-based learning as a teaching strategy.

Ebook: Bringing the Curriculum to Life: Engaging Learners in the English Education System Janice Wearmouth, Karen Lindley, 2021-06-18

How can we bring the curriculum to life so that all young people of compulsory school age are fully engaged in their learning and achieve to their maximum? Professor Janice Wearmouth and Dr Karen Lindley bring together contributions from practising teachers, researchers and academics to answer this question for a range of educational contexts and demonstrate the positive impact that can be achieved on student learning at all levels. This edited volume highlights challenges and opportunities within the current English education system. With reflective questions and ideas for teachers to implement in the classroom, this important book bridges the gap between theory and practice and will be invaluable reading for trainee teachers, teacher trainers, qualified teachers and others with an interest in education and the curriculum. The intrinsic value of the book is that it seeks to illuminate the discussions surrounding the issues identified from differing and alternative perspectives in education.

Dr Barry Paraskeva Costas, Senior Lecturer in Physical Education, University of Hertfordshire, UK: A highly engaging and refreshing look at how a diverse range of learners might be immersed in their learning; this book provides an imaginative and thought-provoking consideration of creative curricula to involve and inspire learners.

Julie Wharton, Senior Lecturer, University of Winchester, UK: This book does an excellent job of drawing together a wide range of contributions and contexts that collectively put the challenges and opportunities of curriculum centre stage.

Dr Warren Kidd, School of Education and Communities, University of East London, UK: Janice Wearmouth is Professor of Education at the University of Bedfordshire, UK. Dr Karen Lindley is Senior Lecturer in Education at the University of Bedfordshire, UK. Both editors are experienced teachers and researchers with continuing close links to Education students, trainee teachers, teacher trainers and practising teachers.

role of drawing in young children's construction of meaning, communication and sense of identity. It provides insights into the influence of media and consumerism as reflected in popular visual imagery and on gender identity formation in young children. It also offers strong messages about the overemphasis on the three Rs in early childhood education. Key reading for students, practitioners and parents who want to encourage young children's drawing development without interfering with their creativity and who need a novel approach to tuning into young children's passions and preoccupations. **EBOOK: *New Perspectives In Primary Education: Meaning And Purpose In Learning And Teaching* Sue Cox, 2011-09-16** This is a timely book enabling teachers to reflect critically upon their existing work place practices which have been so powerfully shaped by the target culture and the logic of performativity that has underpinned it for two decades. More importantly it will empower primary school teachers to play a more active role in effecting curriculum and pedagogical change in their schools and classrooms. Professor John Elliot, School of Education, University of East Anglia, UK. This book encourages you to question the existing culture of schooling, its principles and practices. Current practices have been shaped and dominated by a target-led and outcomes-driven agenda. The book addresses some of the conflicts that arise in the demand for performance on the one hand and teachers' responsiveness to children and their learning on the other. Sue Cox sets out to show how change might be based on clear understandings of how children learn and how teachers contribute to that learning. She does this by providing frameworks for change and shows how from these perspectives participation is key to children's learning. She then goes on to explore the implications for teachers working collaboratively with children in areas such as interaction, curriculum and assessment. An underlying aim of the book is to provide the tools for teachers to develop a principled approach to what they do and how they think in order to challenge some entrenched practices and thinking. This book provides thoughtful reading and promotes reflective thinking for primary teachers, teachers in training and researchers with insight into new ways of thinking about and developing primary education. **EBOOK: *A Practical Guide to Using Second Life in Higher Education* Maggi Savin-Baden, 2010-10-16** In recent years there has been increasing use of virtual worlds in Higher Education, particularly in Second Life. This practical handbook is a pedagogically informed text that guides staff in the use of Second Life in the fields of further and higher education. The book has been designed to support teachers who want to use Second Life and provides both an overview and a detailed consideration of the opportunities this immersive world offers for teaching, learning, assessment and research. To assist readers, Maggi Savin-Baden has included a glossary of terms, details of challenges and mistakes to avoid, examples of good practice, links to websites and other sources of help. This book is designed both for those new to Second Life as well as those with experience of teaching in virtual environments. It will help teachers to progress from getting started with Second Life to developing their teaching within the environment. **EBOOK: *Higher Education Pedagogies* Melanie Walker, 2005-11-16** What does higher education learning and teaching enable students to do and to become? Which human capabilities are valued in higher education and how do we identify them? How

might the human capability approach lead to improved student learning as well as to accomplished and ethical university teaching This book sets out to generate new ways of reflecting ethically about the purposes and values of contemporary higher education in relation to agency learning public values and democratic life and the pedagogies which support these It offers an alternative to human capital theory and emphasises the intrinsic as well as the economic value of higher learning Based upon the human capability approach developed by economist Amartya Sen and philosopher Martha Nussbaum the book shows the importance of justice as a value in higher education It places freedom human flourishing and students educational development at its centre Furthermore it takes up the value Sen attributes to education in the capability approach and demonstrates its relevance for higher education Higher Education Pedagogies offers illustrative narratives of capability learning and pedagogy drawing on student and lecturer voices to demonstrate how this multi dimensional approach can be developed and applied in higher education It suggests an ethical approach to higher education practice and to teaching and learning policy development and evaluation As such the book is essential reading for students and scholars of higher education as well as university lecturers managers and policy makers concerned with teaching and learning
