Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J.

Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten expanded and updated Additionally new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research including major findings and methodologies employed The Handbook authors continue to be international leaders in their respective fields the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community *Teacher Action Research* Gerald J. Pine, 2008-10-31 This is a wonderful book with deep insight into the relationship between teachers action and result of student learning It discusses from different angles impact of action research on student learning in the classroom Writing samples provided at the back are wonderful examples Kejing Liu Shawnee State University Teacher Action Research Building Knowledge Democracies focuses on helping schools build knowledge democracies through a process of action research in which teachers students and parents collaborate in conducting participatory and caring inquiry in the classroom school and community Author Gerald J Pine examines historical origins the rationale for practice based research related theoretical and philosophical perspectives and action research as a paradigm rather than a method Key Features Discusses how to build a school research culture through collaborative teacher research Delineates the role of the professional development school as a venue for constructing a knowledge democracy Focuses on how teacher action research can empower the active and ongoing inclusion of nontraditional voices those of students and parents in the research process Includes chapters addressing the concrete practices of observation reflection dialogue writing and the conduct of action research as well as examples of teacher action research studies *Teacher Professional Learning in an Age of Compliance* Susan Groundwater-Smith, Nicole Mockler, 2009-04-29 Teacher Professional Learning in an Age of Compliance Mind the Gap examines ways in which practice based inquiry in educational settings in a number of different countries and contexts can transcend current ways of working and thinking such that authentic professional learning is the result The authors contend that education policy under pressure from a number of quarters is retreating into a standardized audited and backward looking arena with the advances of more progressive educational philosophy being rolled back In an age where practitioner inquiry and action research have often been hijacked for the purposes of broad based policy implementation this book offers a rationale for reclaiming the critical edge so fundamental to inquiry based professional learning It examines the potential of inquiry based forms of teacher professional learning to contribute to the growth of professional knowledge for and about teachers work The authors intend that the book will assist in building new forms of

professional knowledge that go beyond the current compliance model engineered from less enduring materials to inform a new model with its foundations in a strong ethical and moral framework They also believe that this new model if implemented will help to reverse today s conservative educational trends and make teacher professional development a force for genuine progress once again They have consciously moved away from the celebratory tone of much of the academic reporting of teacher professional learning adopting instead a genuinely critical edge In covering a wide range of policies and practices from across the international spectrum they have allowed themselves the freedom to engage in serious epistemological arguments about the nature of professional knowledge as well as how it is constructed and employed
