The Financial Crisis in Constitutional Perspective Poul F Kjaer, Gunther Teubner, Alberto Febbrajo, 2011-07-27 This volume presents the first thorough sociologically informed legal analysis of the financial crisis which unfolded in 2008 It combines a multitude of theoretically informed analyses of the causes dynamics and reactions to the crisis and contextualises these within the general structural transformations characterising contemporary society It furthermore explores the constitutional implications of the crisis and suggests concrete changes to the constitutional set up of contemporary society Although the question of individual responsibility is of crucial importance the central idea animating the volume is that the crisis cannot be reduced to a mere failure of risk perception and management for which individual and collective actors within and outside of financial organisations are responsible The 2008 crisis should rather be understood as a symptom of far deeper structural transformations For example contemporary society is characterised by massive accelerations in the speed with which societal processes are reproduced as well as radical expansions in the level of globalisation These transformations have however been asymmetrical in nature insofar as the economic system has outpaced its legal and political counterparts The future capability of legal and political systems to influence economic reproduction processes is therefore conditioned by equally radical transformations of their respective operational forms and self understanding Potentially the 2008 crisis therefore has far reaching constitutional implications

Critical theory and legal autopoiesis Gunther Teubner, 2019-05-10 This volume collects and revises the key essays of Gunther Teubner one of the world's leading sociologists of law Written over the past twenty years these essays examine the dark side of functional differentiation and the prospects of societal constitutionalism as a possible remedy Teubner's claim is that critical accounts of law and society require reformulation in the light of the sophisticated diagnoses of late modernity in the writings of Niklas Luhmann Jacques Derrida and select examples of modernist literature Autopoiesis deconstruction and other post foundational epistemological and political

realities compel us to confront the fact that fundamental democratic concepts such as law and justice can no longer be based on theories of stringent argumentation or analytical philosophy. We must now approach law in terms of contingency and self subversion rather than in terms of logical consistency and rational coherence.
