Corporate Reorganization Law and Forces of

Change Sarah Paterson, 2020-10-23 Corporate Reorganisation Law argues that corporate reorganisation law is seen by market participants as a tool they can mobilise and adapt according to practices logics and identities in the of the financial and non financial corporate markets Thus changes in market practice in the participants in the process or in how the participants view their objectives can significantly change the ways in which corporate reorganisation law is mobilised and adapted even if the law has not undergone any reform This book argues that corporate reorganisation law cannot be evaluated using a theoretical model in isolation from the wider institutional context in which corporate reorganisation law is mobilised and adapted by the participants to the process In establishing the new methodology the book undertakes a detailed analysis of six key changes in market practice logic and identities in the financial and non financial corporate fields A comparative US UK approach is adopted in analysing both the process of institutional change and the implications for law This provides a fascinating lens through which to see how different institutional environments in the financial and non financial markets in different jurisdictions are drawing together and interacting with very different legal systems which were adapted to the distinct original institutional environments in which they were developed From this analysis important lessons for legal harmonisation efforts in Europe and in non European jurisdictions are drawn out The work emphasises the need to look at formal legal rules in combination with other non legal and legal institutions and argues that current reform debates in both the US and UK have suffered because scholars practitioners and policy makers have not started their evaluation of the case for reform by placing corporate reorganisation law in this wider institutional context The book aims to fill this gap and to provide a methodological approach for the future

*Transactions in Nigeria* Chima Williams Iheme, 2016-08-16 This book offers a valuable guide to one of the most challenging areas of commercial law now frequently referred to as secured transactions with a focus on Nigerian Canadian and United States perspectives A debtor's ability to provide collateral influences not only the cost of the money borrowed but also in many cases whether secured lenders are willing to offer credit at all The book proposes that increasing access to and indeed lowering the cost of credit could tremendously boost economic development while at the same time arguing that this would best be achieved if the legal framework for secured transactions in Nigeria and of course any other country with similar experiences were designed to allow the use of personal property and fixtures to secure credit Similarly the creation priority perfection and enforcement of security interests in personal property should be simplified and supported by a framework that ensures that neither the interests of secured lenders nor debtors are hampered so as to guarantee the continuous availability of affordable credit as well as debtors willingness to borrow and do business The book further argues that in addition to the obvious preference for real property over personal property by secured lenders due to the unreformed secured transactions legal framework in Nigeria its compartmentalized nature has also resulted in unpredictability in commerce and the concomitant effects of poor access to credit Through the comparative research conducted in this book utilizing the UCC Article 9 and Ontario PPSA as benchmarks the author provides reformers with a repository of tested secured transactions law solutions which law reformers in the Commonwealth countries in Africa and beyond as well as the business community will find valuable in dealing with issues that stem from secured transactions      **Show Me the Money** Chris Roush, 2016-06-10
