Sebastian Vaida, Regardless of which generation you belong to, one thing is clear in this world, and that is the fact that we can no longer avoid technology. As psychologists, we recommend paying attention to the time we spend with and around electronic devices so that it does not become addictive. Beyond that, though, technology is necessary in most aspects of life and useful if we know how to use it and not abuse it. This book is written for all those who have understood the above aspects and want to improve their skills in using electronic programs and devices in order to have more free and quality time with the significant people in their lives, to be more effective at what they do personally and professionally, and get rid of technology anxiety. The book covers several chapters: from the introductory one presented in the form of an infographic of key moments in the history of technology and information, to how electronic content is created, how to communicate and promote this content, how to build social networks through technology, and how technology can be used for research purposes. At the end, we present you with a chapter rarely found in such books, which consists of 30 challenges to develop your technical skills. The last chapter is represented by a series of materials, links to video tutorials, text, and other resources to help you advance to the level you want, in addition to the content of the book. The language is simple and user-friendly. Anyone can successfully go through the content of the book, and the transition from information to skills will certainly occur under one condition: if you are constant and consistent.

Foundation Form Creation with Adobe LiveCycle Designer ES Roderick Smith, 2008-11-01. Form creation is key to information processing, and forms workflow is a key concept within Adobe LiveCycle Enterprise Suite.
