Creating Knowledge Strengthening Nations The Changing Role Of Higher Education:

Creating Knowledge, Strengthening Nations Glen Alan Jones, Patricia Louise McCarney, Michael L. Skolnik, 2005-01-01 Creating Knowledge Strengthening Nations is a crucial addition to the debate on the future of higher education

Knowledge Matters Diana Rhoten, Craig Calhoun, 2011-02-21 Higher education can be a vital public good providing opportunities for students informed citizens for democracy and knowledge to improve the human condition Yet public investment in universities is widely being cut often because public purposes are neglected while private benefits dominate In this collection international scholars confront the realities of higher education and the future of its public and private agenda Their perspectives illuminate the trajectory of education in the twenty first century and the continuing importance of the university's public mission Reporting from Asia Africa Europe Latin America and North America these scholars look at the different ways universities struggle to serve public and private agendas Contributors examine the implications of changes in funding sources as well as amounts different administrative and policy decisions and the significance of various approaches to assessment and evaluation They ask whether wider student access has in fact resulted in social mobility whether more scientific research can be treated as an open access resource how changes in academic publishing change access to knowledge and whether universities get full value from research sold to private corporations At the same time these chapters capture the confusion in the university sector over explaining academic work to a broader public and prioritizing its multiple purposes Authors examine these practical challenges and the implications of different approaches in different contexts

The Global Student Experience Camille Kandiko, Mark Weyers, 2013-03-18 There are 100 million students in higher education throughout the world today This collection provides some indication of what are they are learning and of their wider experiences It also outlines the changing global context of provision for undergraduate students as countries and universities respond to what they anticipate will be new demands f

Towards Powerful Educational Knowledge Jim Hordern, Johan Muller, Deng Zongyi, 2024-04-11 This book explores what constitutes valid or powerful educational knowledge and the role of educational theorising in questions of educational practice It examines the challenges facing the deliberative educational knowledge traditions of educational foundations curriculum theory and Didaktik as a consequence of the rising tide of empiricism in educational research the what works agenda in global educational reform and internal fragmentation within the traditions themselves By examining the potential for the reconfiguration or reconstruction of these traditions the book explores the possibility of reinvigorating deliberative educational theorising in ways that could provide a meaningful basis for educators to conceptualise their practice and a robust response to policies that seek to narrow educational activity to a focus solely on learning outcomes and technical efficiency This insightful volume will be of interest to all those concerned about the future of education and particular the relationship between educational theory and educational practice in curriculum studies teacher education and professional

development It will be a key resource for teachers curriculum developers policy makers and researchers in the field of curriculum theory and didactics The book was originally published as a special issue of Journal of Curriculum Studies

The Global University A. Nelson, I. Wei, 2012-04-05 Engages a topic of pressing concern for government business and education leaders around the world the race to establish world class universities Some herald the globalization of higher education as the key to a dynamic and productive knowledge society Others worry that modern universities have come to resemble multinational corporations

Putting Universities in their Place Louise Kempton, Maria Conceição Rego, Lucir Reinaldo Alves, Paul Vallance, Maurício Aguiar Serra, Mark Tewdwr-Jones, 2021-08-03 There have been several attempts in recent years to create conceptual frameworks and models to help universities and policy makers understand the role and contribution of higher education to local and regional development However these models have failed to fully reflect or give insufficient attention to the impact of the regional context economic social political the policy environment for higher education and territorial development and the diversity of management and leadership structures of universities themselves This has led to the development of static models that rarely work outside of the immediate context in which they were developed and therefore risk leading to design of policies that are not fit for purpose This Policy Expo is the result of work with partners in Europe South America Africa Asia and Australia to develop a new approach the ORPHIC Framework to think about how the university can be adapted to the specificity of institutional and local contexts The book examines What are the different roles that universities play in local and regional development and how do these manifest themselves How can we learn from comparing practice and experience internationally and to what extent are policies aimed at promoting university region relationships transferrable What are the internal university factors such as management and leadership history mission structures and the external factors such as territorial development policy context governance system nature of the place that might help us explain the nature of the relationship

Governmentality Studies in Education, 2009-01-01 Michel Foucault's concept of governmentality originated in a lecture series in the late 1970s at the Collège de France and soon became the basis for a range of historical and contemporary studies across the social sciences and humanities The concept in part rests on a simple but powerful idea that links government to the freedom of the subject in a novel understanding of liberal politics It also provides an analytics of power based on the examination of actual practices This is the first collection to use Foucault's concept in relation to the field of education where it has a natural home given that much educational theory and practice in the liberal tradition at least since Kant has been directed at the goals of autonomy and self government The volume has three sections a general section on Foucault and governmentality with contributions from some of the world's leading scholars in the area including Colin Gordon Jacques Donzelot and Thomas Lemke and two sections devoted to governmentality and education the first outlining Anglo American perspectives the second focusing on European perspectives with contributions from leading scholars such as Tom Popkewitz James Marshall Tom Osborne Michael Peters
