**Emerging Perspectives on Teaching Architecture and Urbanism** David Leite Viana,Emílio da Cruz Brandão,Franklin Morais,Isabel Cristina Carvalho,José P. Duarte,Nicolau Brandão,2023-11-17 This book contains a set of

essays on the teaching of Architecture and Urbanism written by university professors and researchers from several countries. It argues that the teaching of architecture and urbanism is in a state of crisis; architecture seems unable to respond to current problems and urbanism seems incapable of fulfilling the needs of a more balanced society and its built environment, including the human right to housing. The book comprises historical analyses, systematization of concepts, manifestos and social evaluations, and above all, an alignment of new objectives, curricular plans and pedagogical methodologies. **Crash Course in Art** Eva Howarth, 2001-05-09 Every museum and every gallery may have its own catalogue, but here is a survey of European art which will take you easily and quickly through ten centuries of painting. Compiled by a team of leading experts in their fields and written in clear language for ease of appreciation and understanding, *Crash Course in Art* sweeps from medieval religious frescos to the modern period when every ten years brought a new kind of technique to the fore. More than 100 illustrations in colour highlight techniques and characteristics of individual artists, while the text provides illuminating insights into the background of their world. A unique feature is the concise listing of 500 artists with their biographical details, a full index and a bibliography for further reading, plus a technical glossary, give you all the background information.

**Architecture and Choreography** Beth Weinstein, 2024-05-31 *Architecture and Choreography: Collaborations in Dance, Space and Time* examines the field of architectural choreographic experiments, unique interdisciplinary encounters and performed events generated through collaborations between architects and choreographers. Forty case studies spanning four decades give evidence of the range of motivations for embarking on these creative endeavors and diverse conceptual underpinnings, generative methods, objects of inquiry and outcomes. *Architecture and Choreography* builds histories and theories through which to examine these works, the contexts within and processes through which the works emerged, and the critical questions they raise about ways to work together, sites and citations, ethics and equity, control and agency. Three themes frame pairs of chapters. The first addresses disciplinarity through works that critically reflect upon their discipline's tools, techniques and conventions, juxtaposed against projects that cite or use other art forms and cultural phenomena as source material. The second interrogates space and the role of spatial dispositifs, institutions and sites, and their hidden and not so hidden conditions as conceptual drivers and structures to subvert, trouble, unsettle, remember. The third asks who and what dances, finding a spectrum from mobilized architectural bodies to more than human cyborgs. Modes of collaboration and the temporalities and life cycles of projects inform bookending chapters. *Architecture and Choreography* offers vital lessons not only for architects and choreographers but also for students and practitioners across design and performance fields. Once Upon a China CJ Lim, Steve McCloy, 2021-04-15 *Once Upon a China* is an unconventional architectural story of great beauty, empathy, honour and sadness. The chapters are ingenious reimaginations of *Dream of the Red Mansion*, *Journey to the West*, *The Water Margin* and *Romance of the Three Kingdoms*, and are conceived as specific themes of Chinese identity, domesticity, consumerism, democracy and adaptability. These four seminal pre-modern fictions contain diverse voices and philosophical

perspectives on history as well as satires that have defined past developments of Chinese societies politics and the built environment Comics is an unorthodox but extraordinary medium for architectural speculations The eccentric characteristics of comic inspired drawings in this book enrich the processes of conception and conceptualisation of design their fragmented yet sequential nature proves versatile in the imagination of spatial experiences enabling the complex stories of place brief and building to materialise At the same time the politicisation of architecture through comics engenders a sense of optimism to reappraise Chinese design futures and critical thinking beyond the exuberance of non contextual Western capitalist models

**Architecture and the Public Good** Tom Spector,2021-06-01 Why has explaining the value of the architecture profession proven so difficult The architecture profession can be well defended by demonstrating the public good which results from its protected practice Although the book believes in this approach this approach immediately raises the thorny questions of just who is the public and what is its good To answer these questions to explain why the profession has done a poor job explaining itself and to propose a fresh perspective are the challenges set out in this book The book dissects the internal weaknesses and external forces which have prevented architects from asserting their value to the public explains how the concept of the public is itself widely misunderstood investigates the shifting boundaries of the public and private realms and proposes a series of measures by which we can assess and improve an architectural work s publicness Through a renewed focus on the public good that everyday architects are capable of as a profession the book charts an ultimately optimistic program for the architecture profession s renewal
