Creating Competitiveness Entrepreneurship And Innovation Policies For Growth:

Creating Competitiveness David B. Audretsch, Mary Walshok, 2013-02-01 Although competitiveness is typically associated with firms they are not the only organizational body whose performance is dependent upon competitiveness This poignant and insightful book focuses on how the varied economic performance of cities and regions both within nations as well as across nations during the era of the Great Recession also highlights the need for competitiveness Competitive cities and regions enjoy a superior economic performance while their less competitive counterparts experience poorer economic growth and increasing unemployment Using leading frameworks this study provides applications and case studies about what shapes the competitiveness of places in an international context Specific policies that enhance local competitiveness are identified and analyzed Scholars of regional economics urban economics urban planning and public policy as well as policymakers will find plenty of invaluable information in this invigorating book *ECIIC 2019 10th European Conference on Intangibles and Intellectual Capital* Prof. Massimo Sargiacomo, 2019-05-23

From Industrial Organization to Entrepreneurship Erik E. Lehmann, Max Keilbach, 2019-10-04 This book celebrates the contributions of David B Audretsch Distinguished Professor at the School of Public and Environment Affairs SPEA at Indiana University USA co founder and co editor of Small Business Economics and former Director of the Entrepreneurship Growth and Public Policy Group at the erstwhile Max Planck Institute of Economics Jena Germany For his pioneering work which explores the links between entrepreneurship government policy innovation economic development and global competitiveness he has received the 2001 Global Award for Entrepreneurship Research from the Swedish Foundation for Small Business Research and the 2011 Schumpeter Prize from the University of Wuppertal Germany This volume features original contributions from over 50 leading scholars to map analyze and evaluate the impact of Audretsch s research on a broad spectrum of research fields ranging from economics to entrepreneurship and geography The development and evolution of key ideas which have significantly shaped theory and future research across these fields are also explored *The Oxford Handbook of Local Competitiveness* David B. Audretsch, Albert N. Link, Mary Lindenstein Walshok, 2015-08-03 The local levels of economies have felt the impact of technological change and globalization These forces have triggered the need to understand the dynamic mechanisms that enable locales to respond to such changes For example the downsizing of traditional employers because of a major loss in market share due to new competitors acquisition by global firms or off shoring of production or services was traditionally thought to be beyond the scope of powers of local policy makers thinkers and business leaders In the world of practice those concerned about the economic performance of place city region or state are increasingly focused on how to adapt to these trends and leverage their existing resources to respond to these global challenges as a positive opportunity The Oxford Handbook of Local Competitiveness brings together some of the leading minds in the fields of business economics and the social sciences to identify articulate and analyze what influences and shapes local competitiveness and what places

can do to enhance their economic performance The contributors to the Handbook provide a body of systematic analyses suggesting that the local context is a critical element of the forces that shape competitiveness The challenges to generate and sustain economic performance vary across places and the factors and conditions that either enhance or impede competitiveness also are place specific Finally the characteristics and nature of what constitutes success also vary across places This Handbook is essential reading material for academics in the fields of economics and public policy as well as business leaders who hope to gain a more in depth understanding of their field Informative and intellectually rigorous The Oxford Handbook of Local Competitiveness is the definitive volume of scholarly analysis regarding the relationship between place and economic competition

Competitive Strategies for Academic Entrepreneurship: Commercialization of Research-Based Products Szopa, Anna, 2015-09-21 In recent years the pace of technological growth from the very first stages of research and development to full scale industrial implementation has quickened at an exponential rate To better keep pace with rapidly changing market demands the gap between university research incubators and public sector start up companies has undergone a marked contraction *Competitive Strategies for Academic Entrepreneurship Commercialization of Research Based Products* seeks to fill the gap in research between universities and the public and offers cutting edge insight into the current state of the field Charting a course that moves from discussions of academic resistance and implications for knowledge transfer theory to current case studies of academic industrial launch pads like COTEC s Technology Commercialization Accelerator and the Maryland Industrial Partnerships program this publication targets an audience of academicians administrators researchers entrepreneurs and established professionals and seeks to provide insight into the mechanisms by which the research of today becomes the household names of tomorrow

Everything in Its Place David B. Audretsch, 2015-03-02 Every city region and state wants to do better or at the very least not do worse Places have a strong and vigorous concern with and stake in generating a stronger economic performance This concern spans a broad spectrum of constituents and interests including business labor non profit organizations government and private residents However such decision makers mandated with the strategic management of their place receive little guidance or insight from scholars in terms of a systematic framework for evaluating how to generate and sustain a competitive advantage for their place While an entire academic field exists devoted to analyzing how firms and organizations can create and sustain a competitive advantage and ultimately a strong economic performance the field of strategic management in business schools no such analogous field exists which is devoted to guiding and informing decision makers mandated and concerned with the strategic management of their place *Everything in Its Place* seeks to fill this intellectual void explaining the underlying economic and social factors and the broad spectrum of policies and instruments that can actually influence and enhance economic performance in places Several academic fields have generated a number of important theories empirical findings and case studies that shed considerable light on identifying and unraveling the underlying forces about what shapes this economic performance

Combined in this book with the actual experiences and instincts garnered from practitioners and policy makers these insights are integrated together in into a coherent inclusive framework to guide and inform thought leaders and scholars in the strategic management of places

New York's Nanotechnology Model Committee on Competing in the 21st Century: Best Practice in State and Regional Innovation Initiatives, Board on Science, Technology, and Economic Policy, Policy and Global Affairs, National Research Council, 2013-11-28 New York's Nanotechnology Model Building the Innovation Economy is the summary of a 2013 symposium convened by the National Research Council Board on Science Technology and Economic Policy and members of the Nano Consortium that drew state officials and staff business leaders and leading national figures in early stage finance technology engineering education and state and federal policies to review challenges plans and opportunities for innovation led growth in New York The symposium participants assessed New York's academic industrial and human resources identified key policy issues and engaged in a discussion of how the state might leverage regional development organizations state initiatives and national programs focused on manufacturing and innovation to support its economic development goals This report highlights the accomplishments and growth of the innovation ecosystem in New York while also identifying needs challenges and opportunities New York's Nanotechnology Model reviews the development of the Albany nanotech cluster and its usefulness as a model for innovation based growth while also discussing the New York innovation ecosystem more broadly

Handbook of Regions and Competitiveness Robert Huggins, Piers Thompson, 2017-03-31 The aim of this Handbook is to take stock of regional competitiveness and complementary concepts as a means of presenting a state of the art discussion of the contemporary theories perspectives and empirical explanations that help make sense of the determinants of uneven development across regions Drawing on an international field of leading scholars the book is assembled and organized so that readers can first learn about the theoretical underpinnings of regional competitiveness and development theory before moving on to deeper discussions of key factors and principal elements the emergence of allied concepts empirical applications and the policy context

Best Practices in State and Regional Innovation Initiatives National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Competing in the 21st Century: Best Practice in State and Regional Innovation Initiatives, 2013-07-04 Most of the policy discussion about stimulating innovation has focused on the federal level This study focuses on the significant activity at the state level with the goal of improving the public's understanding of key policy strategies and exemplary practices Based on a series of workshops and conferences that brought together policymakers along with leaders of industry and academia in a select number of states the study highlights a rich variety of policy initiatives underway at the state and regional level to foster knowledge based growth and employment Perhaps what distinguishes this effort at the state level is most of all the high degree of pragmatism Operating out of necessity innovation policies at the state level often involve taking advantage of existing resources and recombining them in new ways forging innovative partnerships among

universities industry and government organizations growing the skill base and investing in the infrastructure to develop new technologies and new industries Many of these initiatives are being guided by leaders from the private sector and universities The objective of Best Practices in State and Regional Innovation Initiatives Competing in the 21st Century is not to do an empirical review of the inputs and outputs of various state programs Nor is it to evaluate which programs are superior Indeed some of the notable successes such as the Albany nanotechnology cluster represent a leap of leadership investment and sustained commitment that has had remarkable results in an industry that is actively pursued by many countries The study's goal is to illustrate the approaches taken by a variety of highly diverse states as they confront the increasing challenges of global competition for the industries and jobs of today and tomorrow The Elgar Companion to Innovation and Knowledge Creation Harald Bathelt, Patrick Cohendet, Sebastian Henn, Laurent Simon, 2017-11-24 This unique Companion provides a comprehensive overview and critical evaluation of existing conceptualizations and new developments in innovation research It draws on multiple perspectives of innovation knowledge and creativity from economics geography history management political science and sociology The Companion brings together leading scholars to reflect upon innovation as a concept Part I innovation and institutions Part II innovation and creativity Part III innovation networking and communities Part IV innovation in permanent spatial settings Part V innovation in temporary virtual and open settings Part VI innovation entrepreneurship and market making Part VII and the governance and management of innovation Part VIII

Regional Development: Theory and Practice Baleshwar Thakur, H.S. Sharma, Suresh Misra, S. Chattopadhyay, Surendra Singh, 2017-01-01 The Five Volume Series on Regional Development Theory and Practice is a festschrift dedicated to Professor R P Misra a distinguished scholar widely recognized as one of the pioneers who initiated and promoted Regional Planning studies in India This five volume series with over one hundred research papers on different aspects of regional development is a fitting tribute to the scholar who spent much of his life time thinking researching and writing about development in general and regional development in particular These five volumes each dealing with a specific aspect of regional development Vol 1 Concept of Regional Development Vol 2 Measuring Development Vol 3 Development Patterns and Structures Vol 4 Development Policies and Vol 5 Development Challenges Each of the five volumes begins with an introduction which is unique in the sense that this is not merely an introduction to the contributions contained in the volume but also talks of the theory of regional development contemporary development in the discipline and the contrarian views expressed by various academics and policy makers Another significant aspect of these introductions is the global view and a comparative scenario of the developed developing and under developed economies of the world that the editors have kept in view in a debate seeking an universal theory of regional development Regions are specifics and often unique and regional development implies focusing on the assets of the territory its potential and constraints **Technology-Based Nascent Entrepreneurship** James A. Cunningham, Conor O'Kane, 2017-07-06 This edited volume presents new means of quantifying

the behavioral and consequential differences between technology based and non technology based nascent entrepreneurs in varied economies It explores the socioeconomic place of technology in developed and developing countries and describes the implications of this research for policymakers ability to identify and support new areas of economic growth This book also examines technology based nascent entrepreneurship issues in the context of entrepreneurial leadership business incubation ethnic migrants university researchers new venture formation activities student entrepreneurship and start up competitions The contributors to this collection provide valuable insights for the growing study of and expanding policies addressing nascent entrepreneurship

European Cities in Dynamic Competition Horst Albach,Heribert Meffert,Andreas Pinkwart,Ralf Reichwald,Łukasz Świątczak,2018-08-27 World population and the number of city dwellers are steadily growing Globalization and digitalization lead to an increased competition for skilled and creative labor and other economic resources This is true not only for firms but increasingly also for cities The book elaborates on resulting challenges and opportunities for urban management from the European perspective and discusses theories methods and tools from business economics to cope with them Contributions in this volume come from scholars and practitioners of economics business administration and urban management and cover aspects ranging from urban dynamics to city marketing They draw on experiences from several European cities and regions and discuss strategies to improve city performance including Open Government Smart City cooperation and innovation The book project was initiated and carried out by the Center for Advanced Studies in Management CASiM the interdisciplinary research center of HHL Leipzig Graduate School of Management It is addressed to scholars and managers in Europe and beyond who will benefit from the scientific rigor and useful practical insights of the book

Universities and the Entrepreneurial Ecosystem David B. Audretsch,Albert N. Link,2017-06-30 Entrepreneurial ecosystems have emerged as one of the most dynamic forces shaping the economic performance of individuals companies and regions This book brings together some of the leading scholarship and research identifying and analyzing the role of universities in entrepreneurial ecosystems Particular emphasis is given on the role of innovation startups SMEs and technology transfer both in shaping the entrepreneurial ecosystem as well as the resulting impact on firm performance and regional economic performance

Windows of Opportunity David Sainsbury,2020-02-27 Is neoclassical economics dead Why have the biggest industrial economies stagnated since the financial crisis Is the competitive threat from China a tired metaphor or a genuine danger to our standard of living Lord David Sainsbury draws on his experience in business and government to assemble the evidence and comes to some startling conclusions In *Windows of Opportunity* he argues that economic growth comes not as a steady process but as a series of jumps based on investment in high value added firms Because these firms are engaged in winner takes all competition rapid growth in one country can indeed come at the expense of growth in another contrary to the standard models He suggests a new theory of growth and development with a role for government in picking winners at the level of technologies and industries rather than individual firms With the role of

industrial policy at the centre of the Brexit debate but a significant intellectual gap in setting out what that policy should be this book could not be more timely

A European Strategy for Jobs and Growth Great Britain: Parliament: House of Lords: European Union Committee,2006-03-16 This report by the European Union Committee examines the progress of the European Union in initiating a strategy for jobs and growth across the Community as a whole The background to this report stems from the Spring European Council meeting in 2000 in Lisbon and the launch of an economic reform agenda The Committee observes that since the Lisbon Agenda little progress has been made and the performance of many of the larger European economies has been poor The Committee has noted that certain worrying signs of protectionist behaviour have developed especially regarding barriers of cross border mergers The EU has recognized this weak performance and the Agenda was relaunched in 2005 with a greater focus on the key economic priorities of more growth and jobs Also all Member States are now required to produce an annual National Action Plan highlighting the policies being pursued to improve economic growth and increase employment The Committee sets out a number of recommendations to further push forward the priorities of growth and jobs including that the Commission should seek to complete the progress towards an internal market that Member States should influence one another in the development of good practice through statistical comparison of their economic progress and agree on quantifiable targets that the format of the National Action Plans should include not only the successes but where countries are underperforming that the Agenda be given a higher public profile

Urban Competitiveness Peter

Kresl,Daniele Ietri,2014-08-27 During the past 25 years the burden of managing economic policy for competitiveness has devolved to cities and to urban regions National governments have increasingly been focused on staving off fiscal collapse Mayors and local administrations have become very creative and active in looking after the state of their local economy and have developed extensive agencies for inter city cooperation and action This book explores this evolving role of cities and urban regions Intelligent and rational policy must be based on an accurate understanding of the situation at hand and of the economic theory that can be utilized in the assessment of the most effective means that can be deployed This book examines the theoretical contributions of economists and geographers and through the analyses of the performance of various cities will give the reader an understanding of the logic behind rational policy formation Evaluation of a city s relative competitiveness is a controversial matter and this book provides a full treatment of the various approaches Finally it examines the experiences with competitiveness of several cities in North America and in Europe Urban Competitiveness Theory and Practice confirms that many cities in trying times do have a mechanism for enhancing their competitiveness and can work to create the sort of economic life the city s residents want
