This edited collection of papers is taken from a series of seminars that brought together some of the world's leading authorities in the field of pig and poultry nutrition, health, and production. The fundamental theme is to address the issues of nutrition and health and in particular to cover the interactions and potential conflicts between the two. The importance of digestive function and the influence of nutrition on health and disease are covered in depth. Strategies to combat salmonella and mycotoxins are also discussed. *Formula for the future: nutrition or pathology?* is aimed at nutritionists, veterinarians, and animal producers, as well as students and researchers studying animal and applied biological sciences.
