basis Van der Laan develops a unique philosophy of culture and design that includes considerations on the relationship between nature culture and religious ritual Although this book is informative its principal aim is to be formative On the basis of Van der Laan s instruments of thought the authors develop a methodology to explore the Plastic Number theory and the many ways in which we perceive and interpret proportion Reintroducing playful creativity and intellectual exploration into architectural pedagogy and design practice this book is a gateway for a deeper understanding of the effects of the built environment on human behavior and the various ways in which the human mind perceives and decodes artifacts
