Experiences of Women of Color in an Elite US Public School Catherine Simpson Bueker, 2017-03-20 This study explores the experiences of women of color who attended an elite predominantly white public high school in the Northeastern United States through one of three points of entry as town residents attending their local high school or as commuter or boarding students via two distinct

voluntary racial desegregation programs Women in all three groups experience feelings of marginalization and stigma At the same time many also discuss the benefits of having lived in or attended school in this environment Women developed strong internal bonds within and across their respective groups some were able to racially diversify social networks and increase access to new forms of social capital through both their own initiatives and efforts on the part of adults in the school and community and many also discuss the acquisition of elite forms of cultural capital that have served them into adulthood Even with these general trends point of access clearly mediates the experience with geographic and symbolic boundaries varying by group

Meanings of Mobility Leah Schmalzbauer,2023-07-18 Over the past twenty years elite colleges and universities enacted policies that reshaped the racial and class composition of their campuses and over the past decade Latinos college attendance notably increased While discussions on educational mobility often focus on its perceived benefits that it will ultimately lead to social and economic mobility less attention is paid to the process of making it and the challenges low income youth experience when navigating these elite spaces In *Meanings of Mobility* sociologist Leah C Schmalzbauer explores the experiences of low income Latino youth attending highly selective elite colleges To better understand these experiences Schmalzbauer draws on interviews with 60 low income Latino youth who graduated or were set to graduate from Amherst College one of the most selective private colleges in the United States The vast majority of these students were the first in their immigrant families to go to college in the U S She finds that while most of the students believed attending Amherst provided them with previously unimaginable opportunities adjusting to life on campus came with significant challenges Many of the students Schmalzbauer spoke with had difficulties adapting to the cultural norms at Amherst as well as with relating to their non Latino non low income peers The challenges these students faced were not limited to life on campus As they attempted to adapt to Amherst many felt distanced from the family and friends they left behind who could not understand the new challenges they faced The students credit their elite education for access to extraordinary educational and employment opportunities However their

experiences while in college and afterward reveal that the relationship between educational and social mobility is much more complicated and less secure than popular conversations about the American Dream suggest. Many students found that their educational attainment was not enough to erase the core challenges of growing up in a marginalized immigrant family; many were still poor, faced racism, and those who were undocumented or had undocumented family members still feared deportation. Schmalzbeauer suggests ways elite colleges can better support low-income Latino students and lower the emotional price of educational mobility, including the creation of immigration offices on campus to provide programming and support for undocumented students and their families. She recommends educating staff to better understand the centrality of family for these students and the challenges they face, as well as educating more privileged students about inequality and the life experiences of their marginalized peers. *Meanings of Mobility* provides compelling insights into the difficulties faced by low-income Latinos pursuing educational and social mobility in America's elite institutions.

Lectures on the Psychology of Women Joan C. Chrisler, Carla Golden, 2018-01-12. Twenty-two distinct essays prepared especially for *Lectures on the Psychology of Women* present readers with topics often not covered in depth in standard texts. Essays are written by feminist psychologists, all of whom are active and committed teachers and researchers within the psychology of women. More than half the lectures are new to this edition, and the others have been significantly updated to include recent research and contemporary examples. The book's organization aligns with core texts, making it ideal supplemental reading. However, each lecture stands alone so instructors can assign readings to meet their own course needs. Part I on the diversity of women includes lectures on women with disabilities, social class, immigration, relational race, privilege, aging, sexual fluidity, and mothering. Part II delves into body images and female embodiment, with lectures covering such topics as the sexualization of girls, PMS, weight and body image, media representations of Black women, genital anxieties, and the hairless ideal. Part III addresses women's physical and mental health, with lectures on depression, multicultural therapy, Black women's health in the U.S., and institutional corruption in psychiatry. Part IV focuses on discrimination, control, and violence against women, with lectures on slut-shaming, online gender harassment, and microaggressions. Part V on social justice and activism includes lectures on awareness of intersectional identities and the relation between the psychology of women and feminist activism.

Kids in the Middle Vikki S. Katz, 2014-05-31. Complicating the common view that immigrant incorporation is a top-down process determined largely by parents, Vikki Katz explores how children actively broker connections that enable their families to become woven into the fabric of American life. Children's immersion in the U.S. school system and contact with mainstream popular culture enables them more quickly to become fluent in English and familiar with the conventions of everyday life in the United States. These skills become an important factor in how families interact with their local environments. *Kids in the Middle* explores children's contributions to the family strategies that improve communication between their parents and U.S. schools, healthcare facilities, and social services from the perspectives of children, parents, and the English-speaking service

providers that interact with these families via children's assistance Katz also considers how children's brokering affects their developmental trajectories While their help is critical to addressing short term family needs children's responsibilities can constrain their access to educational resources and have consequences for their long term goals *Kids in the Middle* explores the complicated interweaving of family responsibility and individual attainment in these immigrant families Through a unique interdisciplinary approach that combines elements of sociology and communication approaches Katz investigates not only how immigrant children connect their families with local institutional networks but also how they engage different media forms to bridge gaps between their homes and mainstream American culture Drawing from extensive firsthand research Katz takes us inside an urban community in Southern California and the experiences of a specific community of Latino immigrant families there In addition to documenting the often overlooked contributions that children of immigrants make to their families community encounters the book provides a critical set of recommendations for how service providers and local institutions might better assist these children in fulfilling their family responsibilities The story told in *Kids in the Middle* reveals an essential part of the immigrant experience that transcends both geographic and ethnic boundaries

From Homemakers to Breadwinners to Community Leaders Norma Fuentes-Mayorga, 2023-05-12 In *From Homemakers to Breadwinners to Community Leaders* Norma Fuentes Mayorga compares the immigration and integration experiences of Dominican and Mexican women in New York City a traditional destination for Dominicans but a relatively new one for Mexicans Her book documents the significance of women led migration within an increasingly racialized context and underscores the contributions women make to their communities of origin and of settlement Fuentes Mayorga's research is timely especially against the backdrop of policy debates about the future of family reunification laws and the unprecedented immigration of women and minors from Latin America many of whom seek human rights protection or to reunite with families in the US *From Homemakers to Breadwinners to Community Leaders* provides a compelling look at the suffering of migrant mothers and the mourning of family separation but also at the agency and contributions that women make with their imported human capital and remittances to the receiving and sending community Ultimately the book contributes further understanding to the heterogeneity of Latin American immigration and highlights the social mobility of Afro Caribbean and indigenous migrant women in New York

and tables provide valuable statistics and comparative data both historic and current A special feature of this edition is the inclusion of more than 80 full text primary documents from 1787 to 2013 laws and treaties referenda Supreme Court cases historical articles and letters Social Poverty Sarah Halpern-Meekin,2019-06-04 How low income people cope with the emotional dimensions of poverty Could a lack of close meaningful social ties be a public rather than just a private problem In Social Poverty Sarah Halpern Meekin provides a much needed window into the nature of social ties among low income unmarried parents highlighting their often ignored forms of hardship Drawing on in depth interviews with thirty one couples collected during their participation in a government sponsored relationship education program called Family Expectations she brings unprecedented attention to the relational and emotional dimensions of socioeconomic disadvantage Poverty scholars typically focus on the economic use value of social ties for example how relationships enable access to job leads informal loans or a spare bedroom However Halpern Meekin introduces the important new concept of social poverty identifying it not just as a derivative of economic poverty but as its own condition which also perpetuates poverty Through a careful and nuanced analysis of the strengths and limitations of relationship classes she shines a light on the fundamental place of core socioemotional needs in our lives Engaging and compassionate Social Poverty highlights a new direction for policy and poverty research that can enrich our understanding of disadvantaged families around the country **Social Statistics for a Diverse Society** Chava Frankfort-Nachmias,Anna Leon-Guerrero,Georgiann Davis,2020-01-21 The Ninth Edition of Social Statistics for a Diverse Society continues to emphasize intuition and common sense while demonstrating the link between the practice of statistics and important social issues **Race, Gender, and Class in the Tea Party** Meghan A. Burke,2015-01-27 It has been all too tempting to characterize the Tea Party as an irrational racist astro turf movement composed of members who are working to subvert their own economic interests Race Gender and Class in the Tea Party reveals a much messier and much more fascinating analysis of this movement Drawing upon in depth interviews with organizers and fieldwork at conservative campaign trainings and conventions its rich ethnographic data explores how the active folks in this movement specifically organizers in one Midwestern state understand their world and how they act on that basis to change it As this book will reveal most Tea Party organizers do depend on deeply flawed understandings of race and class either believing wholeheartedly in myths or confining their analyses to the narrow limits of the conservative media system Yet Tea Party racism is simply American racism Race Gender and Class in the Tea Party reveals the complexities and contradictions inherent in this movement where organizers attempt to reconcile their personal experiences with their conservative politics In the end these dynamics reveal as much about us as it does about the Tea Party It is certain to challenge all of our politics and especially our scholarly thinking about the movement and offers a path toward real conversations about our collective future in the United States Essentials of Social Statistics for a Diverse Society Anna Leon-Guerrero,Chava Frankfort-Nachmias,Georgiann Davis,2020-09-10 Essentials of Social Statistics for a Diverse Society is

a briefer version of the successful Social Statistics for a Diverse Society that helps students learn key statistical concepts through real research examples related to race class gender and other sociological concepts

Migration Theory Caroline B. Brettell, James F. Hollifield, 2014-08-25 During the last decade the issue of migration has increased in global prominence and has caused controversy among host countries around the world To remedy the tendency of scholars to speak only to and from their own disciplinary perspective this book brings together in a single volume essays dealing with central concepts and key theoretical issues in the study of international migration across the social sciences Editors Caroline B Brettell and James F Hollifield have guided a thorough revision of this seminal text with valuable insights from such fields as anthropology demography economics geography history law political science and sociology Each essay focuses on key concepts questions and theoretical frameworks on the topic of international migration in a particular discipline but the volume as a whole teaches readers about similarities and differences across the boundaries between one academic field and the next How for example do political scientists wrestle with the question of citizenship as compared with sociologists and how different is this from the questions that anthropologists explore when they deal with ethnicity and identity Are economic theories about ethnic enclaves similar to those of sociologists What theories do historians the essentializers and demographers the modelers draw upon in their attempts to explain empirical phenomena in the study of immigration What are the units of analysis in each of the disciplines and do these shape different questions and diverse models and theories Scholars and students in migration studies will find this book a powerful theoretical guide and a text that brings them up to speed quickly on the important issues and the debates All of the social science disciplines will find that this book offers a one stop synthesis of contemporary thought on migration

Parents Without Papers Frank D. Bean, Susan K. Brown, James D. Bachmeier, Susan Brown, James Bachmeier, 2015-10-01 For several decades Mexican immigrants in the United States have outnumbered those from any other country Though the economy increasingly needs their labor many

remain unauthorized In *Parents Without Papers* immigration scholars Frank D Bean Susan K Brown and James D Bachmeier document the extent to which the outsider status of these newcomers inflicts multiple hardships on their children and grandchildren *Parents Without Papers* provides both a general conceptualization of immigrant integration and an in depth examination of the Mexican American case The authors draw upon unique retrospective data to shed light on three generations of integration They show in particular that the membership exclusion experienced by unauthorized Mexican immigrants that is their fear of deportation lack of civil rights and poor access to good jobs hinders the education of their children even those who are U S born Moreover they find that children are hampered not by the unauthorized entry of parents itself but rather by the long term inability of parents especially mothers to acquire green cards When unauthorized parents attain legal status the disadvantages of the second generation begin to disappear These second generation men and women achieve schooling on par with those whose parents come legally By the third generation socioeconomic levels for women equal or surpass those of native white women But men reach parity only through greater labor force participation and longer working hours results consistent with the idea that their integration is delayed by working class imperatives to support their families rather than attend college An innovative analysis of the transmission of advantage and disadvantage among Mexican Americans *Parents Without Papers* presents a powerful case for immigration policy reforms that provide not only realistic levels of legal less skilled migration but also attainable pathways to legalization Such measures combined with affordable access to college are more important than ever for the integration of vulnerable Mexican immigrants and their descendants
