acostumbradas a resolver los problemas complejos que con frecuencia se les presentan en el ejercicio habitual de su profesión. No cabe duda alguna de que se trata de una tarea muy difícil pero creo que todos los técnicos están de acuerdo en que en el sector de la edificación sobran leyes y faltan soluciones técnicas inteligentes y prácticas destinadas a que resuelvan realmente los problemas no a que los compliquen o para que sirvan de plataforma a los técnicos para realizar tareas de lucimiento doctrinal absolutamente técnicas y que en ocasiones complican más que resuelven. El lector tiene delante un libro sobre la profesión de Aparejador que a pesar de lo que algunos piensen ha sido y es una de las más importantes en el sector de la edificación desde que tenemos noticias históricas de ella.

Acreditación y certificación de la educación superior: Experiencias, realidades y retos para las IES, 2006. Curación Digital y Género en la Ciencia de la Información: acceso y preservación. Clara Sainz de Baranda Andújar, Jordi Ribeira Planella, María-Antonia Ovalle-Perandones, Mirelys Puerta-Díaz, Daniel Martínez-Ávila, Marian Blanco-Ruiz, William Barbosa Vianna, Maria Cristina Vieira de Freitas, Andrea Vasconcelos Carvalho, Denise Fukumi Tsunoda, Stephanie Cerqueira Silva, Cristina Portugal, Mônica Moura, Márcio Guimarães, Iana Uliana Perez, José Carlos Magro Junior, José Carlos Abbud Grácio, Telma Campanha de Carvalho Madio, Edberto Ferneda, Natalia Nakano, Mariana Cantisani Padua, Laís Alpi Landim, Lucinéia da Silva Batista, 2022-10-03. El mundo de las presencias es simulado, presentado y representado en el medio digital. En el contexto de la comunicación digital virtual y a partir de las recientes transformaciones en sus soportes, las colecciones multimodales de información pasan a un estado en el que el acceso de los sujetos informacionales a la información se puede facilitar y ampliar. En tal universo la información y los datos representados necesitan tratamientos conceptuales y técnicos que respeten la naturaleza y las particularidades de los medios y de los lenguajes que transitan por ellos. Además al ser procesados en un medio frágil como es el digital, la información codificada para medios electrónicos también requiere de procedimientos y cuidados dirigidos a su preservación integral. En la Ciencia de la Información, el conjunto de procedimientos continuos e iterativos destinados a satisfacer las demandas de atención para optimizar el acceso y la preservación se denomina Curación Digital, un complejo de procesos que van desde el design inicial y conceptualización hasta la designación de metadatos, la evaluación de decisiones de preservación o descarte, la transformación, el acceso, el intercambio y la reevaluación de objetos digitales. En temas relacionados con el género, la necesidad de la Curación Digital de la información presentada en medios electrónicos se torna urgente dados los dramáticos hechos que preocupan por la falta de información o por la desinformación en los múltiples territorios que abarca el concepto. En ellos, la información debe ser procesada con el propósito sociocultural de realizar la creación de estrategias e instrumentos para superar los innumerables desafíos e injusticias presentes.
