Things You Should Know

1. This is a catalytic heater. Burning occurs within the pad at a lower temperature than a normal flame due to evenly distributed platinum. But, heat guard and burner rim still get hot enough to burn you. Be careful.
2. The catalytic process takes approximately 10 minutes to reach full heat output.
3. Do not use heater for cooking or warming items, this can destroy combustion and catalyst. This heater has a low burn temperature (no flame) but it can still burn clothing, sleeping bags, etc., that might fall on the burner surface.
4. To avoid damage to the catalyst, do not allow head pad to come in contact with or around silicone based hand creams, paints, etc.
5. Do not touch the gray ceramic fiber head pad or poke a hole into it.
6. Do not attempt clearing the head assembly.
