Collected Papers Of Michael E Soule Early Years In Modern Conservation Biology:

Collected Papers of Michael E. Soulé Michael E. Soulé, In the early 1970s the environmental movement was underway Overpopulation was recognized as a threat to human well being and scientists like Michael Soul believed there was a connection between anthropogenic pressures on natural resources and the loss of the planet s biodiversity Soul thinker philosopher teacher mentor and scientist recognized the importance of a healthy natural world and with other leaders of the day pushed for a new interdisciplinary approach to preserving biological diversity Thirty years later Soul is hailed by many as the single most important force in the development of the modern science of conservation biology This book is a select collection of seminal writings by Michael Soul over a thirty year time span from 1980 through the present day Previously published in books and leading journals these carefully selected pieces show the progression of his intellectual thinking on topics such as genetics ecology evolutionary biology and extinctions and how the history and substance of the field of conservation biology evolved over time It opens with an in depth introduction by marine conservation biologist James Estes a long time colleague of Soul s who explains why Soul s special combination of science and leadership was the catalyst for bringing about the modern era of conservation biology Estes offers a thoughtful commentary on the challenges that lie ahead for the young discipline in the face of climate change increasing species extinctions and impassioned debate within the conservation community itself over the best path forward Intended for a new generation of students this book offers a fresh presentation of goals of conservation biology and inspiration and guidance for the global biodiversity crises facing us today Readers will come away with an understanding of the science passion idealism and sense of urgency that drove early founders of conservation biology like Michael Soul

Beloved Beasts: Fighting for Life in an Age of Extinction

Michelle Nijhuis, 2021-03-09 Winner of the Sierra Club s 2021 Rachel Carson Award One of Chicago Tribune s Ten Best Books of 2021 Named a Top Ten Best Science Book of 2021 by Booklist and Smithsonian Magazine At once thoughtful and thought provoking Beloved Beasts tells the story of the modern conservation movement through the lives and ideas of the people who built it making a crucial addition to the literature of our troubled time Elizabeth Kolbert author of The Sixth Extinction In the late nineteenth century humans came at long last to a devastating realization their rapidly industrializing and globalizing societies were driving scores of animal species to extinction In Beloved Beasts acclaimed science journalist Michelle Nijhuis traces the history of the movement to protect and conserve other forms of life From early battles to save charismatic species such as the American bison and bald eagle to today s global effort to defend life on a larger scale Nijhuis s spirited and engaging account documents the changes of heart that changed history Dan Cryer Boston Globe With urgency passion and wit Michael Berry Christian Science Monitor she describes the vital role of scientists and activists such as Aldo Leopold and Rachel Carson reveals the origins of vital organizations like the Audubon Society and the World Wildlife Fund explores current efforts to protect species such as the whooping crane and the black rhinoceros and confronts the darker

side of modern conservation long shadowed by racism and colonialism As the destruction of other species continues and the effects of climate change wreak havoc on our world *Beloved Beasts* charts the ways conservation is becoming a movement for the protection of all species including our own

Unsettling Science and Religion Whitney Bauman, Lisa Stenmark, 2018-05-24 This book borrows from the intellectual labor of queer theory in order to unsettle or queer the discourses of religion and science and by extension the science and religion discourse Drawing intellectual and social cues from works by influential theorists such as Michel Foucault Judith Butler and Eve Sedgwick chapters in this volume converge on at least three common features of queer theory First queer theory challenges givens that on occasion still undergird religiously and scientifically informed ways of thinking Second it takes embodiment seriously Third this engagement inevitably generates new pathways for thinking about how religious and scientific truths matter These three features ultimately lend support to critical investigations into the meanings of science and religion and the relationships between the two

God and Gaia Michael S Northcott, 2022-12-22 *God and Gaia* explores the overlap between traditional religious cosmologies and the scientific Gaia theory of James Lovelock It argues that a Gaian approach to the ecological crisis involves rebalancing human and more than human influences on Earth by reviving the ecological agency of local and indigenous human communities and of nonhuman beings Present day human ecological influences on Earth have been growing at pace since the Scientific and Industrial Revolutions when modern humans adopted a machine cosmology in which humans are the sole intelligent agency The resultant imbalance between human and Earthly agencies is degrading the species diversity of ecosystems causing local climate changes and threatens to destabilise the Earth as a System Across eight chapters this ambitious text engages with traditional cosmologies from the Indian Vedas and classical Greece to Medieval Christianity with case material from Southeast Asia Southern Africa and Great Britain It discusses concepts such as deep time and ancestral time the ethics of genetic engineering of foods and viruses and holistic ecological management Northcott argues that an ontological turn that honours the differential agency of indigenous humans and other kind and that draws on sacred traditions will make it possible to repair the destabilising impacts of contemporary human activities on the Earth System and its constituent ecosystems This book will be of considerable interest to students and scholars of the environmental humanities history and cultural and religious studies

Rethinking Post-Disaster Recovery Laura Centemeri, Sezin Topçu, J. Peter Burgess, 2021-11-18 This book presents an original interdisciplinary approach to the study of the so called recovery phase in disaster management centred on the notion of repairing The volume advances thinking on disaster recovery that goes beyond institutional and managerial challenges descriptions and analyses It encourages socially politically and ethically engaged questioning of what it means to recover after disaster At the centre of this analysis contributions examine the diversity of processes of repairing through which recovery can take place and the varied meanings actors attribute to repair at different times and scales of such processes It also analyses the multiple arenas juridical expert political

in which actors struggle to make sense of the what ness of a disaster and the paths for recovery These struggles are interlinked with interest based and power based struggles which maintain structural inequality and exploitation existing social hierarchies and established forms of marginality The work uses case studies from all over the world cutting edge theoretical discussions and original empirical research to put critical and interpretative approaches in social sciences into dialogue opening the venue for innovative approaches in the study of environmental disasters This book will be of much interest to students of disaster management sociology anthropology law and philosophy *Bedreigde dieren* Michelle Nijhuis,2022-10-24 In *Bedreigde dieren* volgt Michelle Nijhuis de geschiedenis van natuurbewegingen als het WNF van individueel idealisme tot wereldwijde inzet voor de bescherming van het leven op grote schaal In *Bedreigde dieren* volgt wetenschapsjournalist Michelle Nijhuis de geschiedenis van natuurbewegingen Al aan het einde van de negentiende eeuw werd duidelijk dat onze snel industrialiserende samenleving een desastreuze invloed heeft op de leefomgeving van dieren en planten De slachtingen onder bizons de internationale jacht op vogels voor hun veren en de wereldwijde ontbossing leidden destijds tot de geboorte van de eerste natuurbeschermingsorganisaties Nijhuis laat in dit prachtige boek overtuigend zien hoe de inspanningen en het idealisme van een enkeling kunnen leiden tot grote en invloedrijke natuurbeschermingsorganisaties en die zijn vandaag de dag misschien wel noodzakelijker dan ooit
