*Reading, Writing, and Rigor* Nancy Boyles, 2018-04-12

What does rigor, a word that frequently pops up in conversations about education, really mean? More specifically, what does it mean for literacy instruction and how does it relate to challenging standards-based assessments? In this informative and practical guide, literacy expert Nancy Boyles uses the framework from Webb's Depth of Knowledge (DOK) to answer these questions, offering experience-based advice along with specific examples of K-8 assessment items. Boyles defines rigor and shows how it relates to literacy at each DOK level and explains the kind of thinking students will be expected to demonstrate. She then tackles the essence of what teachers need to know about how DOK and its associated rigors are measured on standards-based assessments. Specifically, readers learn how each DOK rigor aligns with standards, text complexity, close reading, student interaction, the reading-writing connection, and formative assessment. Teachers, coaches, and administrators will find clear guidance, easy-to-implement strategies, dozens of useful teaching tools and resources, and encouragement to help students achieve and demonstrate true rigor in reading and writing.

Collecting for the Curriculum Amy J. Catalano, 2015-09-28

If you're a librarian charged with collecting curriculum materials and children's literature to support the Common Core State Standards, then this book is the only one that offers explicit advice on collection development in curriculum collections for you. While there are many publications on the Common Core for school librarians and K-12 educators, no such literature exists for curriculum librarians at the post-secondary level. This book fills that gap, standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards (CCSS). The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices. The book begins with a primer on the CCSS and how curriculum librarians can support them. Discussion of the Standards is then woven through chapters arranged by content area that share research-based practices in curriculum development and instruction to guide you in curriculum selection. Material types covered include games, textbooks, children's literature, primary sources, counseling, and nonfiction. Additional chapters cover the management of curriculum collections, testing collections, and instruction and reference, as well as how to support and collect for special needs learners. Current practices in collection development for curriculum materials librarians are also reviewed. The book closes with a discussion of the future of curriculum materials.
