A Collector's Guide to American Flyer "Tru-Model" Trains, 3/16" Scale "O" Gauge, 1939-1941 Richard A Hosmer, 2020-09-14 Following responses from numerous discussions arguments with mostly older train guys as to whether American Flyer trains had two or three rail track it seemed some clarification was in order It also appeared that while the post war S gauge two rail period is quite well covered there is very little information still in print on their immediate ancestors The purpose of this little guide is to present to the people who are unaware of their existence the three rail Tru Model toy trains of the A C Gilbert Company of New Haven CT which were introduced at the 1939 New York World s Fair and which were produced until the war imposed shutdown of non essential

manufacturing in July 1942 Dimensions and color schemes are provided throughout the work Wheel arrangements follow the Whyte system of course Lengths given exclude couplers Locomotive lengths given include the proper tender At LEAST one large color photo is included for EACH distinct item and EVERY set is illustrated in catalog format in color Captions are self explanatory All 220 photographs were taken by the author of specimens from his personal collection unless specifically credited otherwise While an attempt was made to show better grade collectible specimens the cars are representative of vintage TOYS and are not intended to represent the pristine mint in the box items available to only a very wealthy few It should be noted that when Gilbert brought American Flyer in 1938 there was a substantial amount of salable but non scale Chicago inventory on hand Prior to that time most toy trains in general were quite unrealistic in appearance particularly car length If you wanted more realism you had but one choice build from scratch This guide does NOT cover ANY of that pre 1940 Chicago Flyer material The 1939 American Flyer catalog first introduced the die cast 3 16 scale equipment but only in the four most expensive sets with would become the two top of the line locomotives By 1940 the conversion to 3 16 scale including the first pressed steel cars was well under way but it was not until the 1941 catalog that ALL offerings were of Gilbert s new 3 16 scale design The first post war catalog for 1946 does not list the very limited remaining stock of O gauge trains which was sold off as soon as possible so as to concentrate on the brand new and more exciting two rail lineup There is some intentional redundancy in the descriptions since it is felt that many users are going to simply look in the index for their car s and I wanted them to be able to find everything in one place without their having to crawl page by page It should be noted that legitimate factory produced items are known with some feature s differing slightly from the standard versions of the items presented here Money was saved wherever possible and shortcuts were taken particularly as to colors and markings Nothing was wasted some cabooses were even made on tender frames The most common off beat example being that some cars will have two American Flyer Lines decals instead of the normal one plus the car number Paint shades may vary It must be remembered that their intent was to produce operable toys hopefully at a profit for the enjoyment of mostly children and they were not following any rigid rules to satisfy nit picking collectors in the then far distant future Within certain parameters almost anything is at least possible and after 80 years some repairs repaints etc have themselves acquired the patina of genuine ness and antiquity The author takes full responsibility for the accuracy of any opinions regarding such specimens which may be stated in this work The author welcomes input from fellow collectors having any corrections or further information regarding these trains which may be incorporated into future editions of this work

Narrow Gauge Railway Stamps Howard Piltz, 2017-11-30 This the first of four books looks at the treatment of varying aspects of public transport with the aid of postage stamps either issued by the postal authorities of most of the worlds nations or some of the railway companies themselves especially heritage operators It has long intrigued the author as to why narrow gauge systems throughout the world have demanded a far greater attention from the public and stamp producers

than railway subjects from the standard gauge lines which make up the vast majority of the western worlds major railway systems The conclusion he has reached is that in most cases they are considered cute a truly abominable term which is thankfully gradually fading from our vocabulary but just how the author felt on first seeing engines of the Talyllyn Railway in mid Wales from the top of the station approach at Tywyns Wharf Station tiny little kettles in sparkling rich green and lots of brass The Talyllyn has the double honor of being the worlds first railway to be taken over and operated by a preservation society in 1951 and also the first railway in the modern era to issue its own Railway Letter Service stamps a practice that can be traced back to the very earliest of times which allowed people in outlying areas to send letters by the railways to the nearest post office for onward transport The Talyllyns first stamps were issued in 1957 and today the lucky collector can demand a substantial premium on the paltry issue value From whatever origin or country there is a huge variety of stamps covering narrow gauge railways and usually they are attractive miniature works of art that make them very collectable The author has not set out to cover every country or issue in these books but to present a wide selection of those stamps that are note worthy
