Since humans first emerged as a distinct species they have eaten fought prayed and moved with other animals In this stunningly original and conceptually rich book historian Alan Mikhail puts the history of human animal relations at the center of transformations in the Ottoman Empire from the sixteenth to the nineteenth centuries Mikhail uses the history of the empire's most important province Egypt to explain how human interactions with livestock dogs and charismatic megafauna changed more in a few centuries than they had for millennia The human world became one in which animals social and economic functions were diminished Without animals humans had to remake the societies they had built around intimate and cooperative interactions between species The political and even evolutionary consequences of this separation of people and animals were wrenching and often violent This book's interspecies histories underscore continuities between the early modern period and the nineteenth century and help to reconcile Ottoman and Arab histories Further the book highlights the importance of integrating Ottoman history with issues in animal studies economic history early modern history and environmental history Carefully crafted and compellingly argued *The Animal in Ottoman Egypt* tells the story of the high price humans and animals paid as they entered the modern world *How Dogs Think* Stanley Coren, 2008-12-26

Our understanding of how dogs think is littered with common misconceptions about the extent of their intellect and how they make sense of the world around them *How Dogs Think* unravels the mystery of what a dog can understand and how much dogs can learn World renowned dog expert Stanley Coren explores the thought processes of dogs describes how dogs solve problems explains the depths and limits of their thinking and examines the kind of concepts which dogs can and cannot deal with Along with practical advice for people who want to improve their dog's learning ability and working intelligence *How Dogs Think* will answer such questions as Do dogs have a notion of time To what extent do dogs understand what you say How sharp are their senses What do they see and hear Do dogs have a sense of music humour empathy guilt or love Do they learn by observation the way that people do How much can they remember Do dogs have ESP or the ability to predict earthquakes and is it true that they can detect cancer or the onset of an epileptic fit in their owners Drawing on all the latest scientific research *How Dogs Think* will enable dog owners everywhere to understand more about what goes on in the mind of their best friend **Communication in Humans and Other Animals** Gisela Håkansson, Jennie Westander, 2013-06-27

Communication is a basic behaviour found across animal species Human language is often thought of as a unique system which separates humans from other animals This textbook serves as a guide to different types of communication and

suggests that each is unique in its own way human verbal and nonverbal communication communication in nonhuman primates in dogs and in birds Research questions and findings from different perspectives are summarized and integrated to show students similarities and differences in the rich diversity of communicative behaviours A core topic is how young individuals proceed from not being able to communicate to reaching a state of competent communicators and the role of adults in this developmental process Evolutionary aspects are also taken into consideration and ideas about the evolution of human language are examined The cross disciplinary nature of the book makes it useful for courses in linguistics biology sociology and psychology but it is also valuable reading for anyone interested in understanding communicative behaviour

Empire of Dogs Aaron Skabelund, 2011-12-15 In 1924 Professor Ueno Eizaburo of Tokyo Imperial University adopted an Akita puppy he named Hachiko Each evening Hachiko greeted Ueno on his return to Shibuya Station In May 1925 Ueno died while giving a lecture Every day for over nine years the Akita waited at Shibuya Station eventually becoming nationally and even internationally famous for his purported loyalty A year before his death in 1935 the city of Tokyo erected a statue of Hachiko outside the station The story of Hachiko reveals much about the place of dogs in Japan s cultural imagination In the groundbreaking *Empire of Dogs* Aaron Herald Skabelund examines the history and cultural significance of dogs in nineteenth and twentieth century Japan beginning with the arrival of Western dog breeds and new modes of dog keeping which spread throughout the world with Western

imperialism He highlights how dogs joined with humans to create the modern imperial world and how in turn imperialism shaped dogs bodies and their relationship with humans through its impact on dog breeding and dog keeping practices that pervade much of the world today In a book that is both enlightening and entertaining Skabelund focuses on actual and metaphorical dogs in a variety of contexts the rhetorical pairing of the Western colonial dog with native canines subsequent campaigns against indigenous canines in the imperial realm the creation maintenance and in some cases restoration of Japanese dog breeds including the Shiba Inu the mobilization of military dogs both real and fictional and the emergence of Japan as a pet superpower in the second half of the twentieth century Through this provocative account Skabelund demonstrates how animals generally and canines specifically have contributed to the creation of our shared history and how certain dogs have subtly influenced how that history is told Generously illustrated with both color and black and white images Empire of Dogs shows that human canine relations often expose how people especially those with power and wealth use animals to define regulate and enforce political and social boundaries between themselves and other humans especially in imperial contexts

The Social Dog Juliane Kaminski, Sarah Marshall-Pescini, 2014-05-20 Dogs have become the subject of increasing scientific study over the past two decades chiefly due to their development of specialized social skills seemingly a result of selection pressures during domestication to help them adapt to the human environment The Social Dog Behaviour and Cognition includes chapters from leading researchers in the fields of social cognition and behavior vocalization evolution and more focusing on topics including dog dog and dog human interaction bonding with humans social behavior and learning and more Dogs are being studied in comparative cognitive sciences as well as genetics ethology and many more areas As the number of published studies increases this book aims to give the reader an overview of the state of the art on dog research with an emphasis on social behavior and socio cognitive skills It represents a valuable resource for students veterinarians dog specialists or anyone who wants deeper knowledge of his or her canine companion Reviews the state of the art of research on dog social interactions and cognition Includes topics on dog dog as well as dog human interactions Features contributions from leading experts in the field which examine current studies while highlighting the potential for future research
