Cooperative Learning in Higher Education Barbara Millis, 2023-07-03 Research has identified cooperative learning as one of the ten High Impact Practices that improve student learning If you've been interested in cooperative learning but wondered how it would work in your discipline this book provides the necessary theory and a wide range of concrete examples Experienced users of cooperative learning demonstrate how they use it in settings as varied as a developmental mathematics course at a community college and graduate courses in history and the sciences and how it works in small and large classes as well as in hybrid and online environments The authors describe the application of cooperative learning in biology economics educational psychology financial accounting general chemistry and literature at remedial introductory and graduate levels The chapters showcase cooperative learning in action at the same time introducing the reader to major principles such as individual accountability positive interdependence heterogeneous teams group processing and social or leadership skills The authors build upon and cross reference each others chapters describing particular methods and activities in detail They explain how and why they may differ about specific practices while exemplifying reflective approaches to teaching that never fail to address important assessment issues

Changing Conceptions, Changing Practices Angela Glotfelter, Caitlin Martin, Mandy Olejnik, Ann

Updike,Elizabeth Wardle,2022-12-28 Changing Conceptions Changing Practices demonstrates that it is possible for groups of faculty members to change teaching and learning in radical ways across their programs despite the current emphasis on efficiency and accountability Relating the experiences of faculty from disciplines as diverse as art history economics psychology and philosophy this book offers a theory and research based heuristic for helping faculty transform their courses and programs as well as practical examples of the heuristic in action The authors draw on the threshold concepts framework research in writing studies and theories of learning leadership and change to deftly explore why faculty are often stymied in their efforts to design meaningful curricula for deep learning and how carefully scaffolded professional development for faculty teams can help make such change possible This book is a powerful demonstration of how faculty members can be empowered when professional development leaders draw on a range of scholarship that is not typically connected In today's climate courses programs and institutions are often assessed by and rewarded for proxy metrics that have little to do with learning with grave consequences for students The stakes have never been higher particularly for public higher education Faculty members need opportunities to work together using their own expertise and to enact meaningful learning opportunities for students Professional developers have an important role to play in such change efforts WAC scholars and practitioners leaders of professional development and centers for teaching excellence program administrators and curriculum committees from all disciplines and faculty innovators from many fields will find not only hope but also a blueprint for action in Changing Conceptions Changing Practices Contributors Juan Carlos Albarr n Jos Amador Annie Dell Aria Kate de Medeiros Keith Fennen Jordan A Fenton Carrie E Hall Elena Jackson Albarr n Erik N Jensen Vrinda Kalia Janice Kinghorn Jennifer Kinney Sheri Leafgren Elaine Maimon Elaine Miller Gaile Pohlhaus Jr Jennifer J Quinn Barbara J Rose Scott Sander Brian D Schultz Ling Shao L James Smart Pepper Stetler **Research Methods for Health and Social Care**
