Doing Teacher Research:

Doing Teacher Research Donald Freeman,1998 Doing Teacher Research is one volume of the authoritative 13 title TeacherSource series The author examines the issue from three distinct perspectives Teachers Voices which are authentic accounts of teacher s experiences Frameworks which are comprehensive discussions of theoretical issues and Investigations which are inquiry based activities

Doing Teacher-Research Wolff-Michael Roth,2007-01-01 There are many teachers who think about doing research in their own classes and schools but who are perplexed by what appears to be involved This book is intended for these perplexed practitioners to provide them with an easily understandable narrative about the concrete praxis of doing research in their classrooms or in those of their teacher peers teaching next door or in the same school The fundamental idea underlying this book is to provide an easily accessible but nevertheless intellectually honest text that allows teachers to increase their agency with respect to better understanding their praxis and the events in their classrooms by means of research The author draws on his experience of doing teacher research while being a high school teacher and department head Roth uses six concrete research studies that he has conducted alone or with peers to describe the salient parts of any teacher researcher investigation including what topic to study issues of ethics and permissions from students school and parents how and what sources to collect how to structure resources how to construct data from the materials how to derive claims and how to write a report research study Roth chose the case based approach because cases provide the details necessary for understanding why and how he as teacher researcher has made certain decisions and what he would do differently today Using this case based approach he allows readers to tie methods choices to situations that they likely are familiar with
