Beauty and Sublimity Patrick Colm Hogan, 2016-03-11 Recent decades have witnessed an explosion in neuroscientific and related research treating aesthetic response This book integrates this research with insights from philosophical aesthetics to propose new answers to longstanding questions about beauty and sublimity Hogan begins by distinguishing what we respond to as beautiful from what we count socially as beautiful He goes on to examine the former in terms of information processing specifically prototype approximation and non habitual pattern recognition and emotional involvement especially of the endogenous reward and attachment systems In the course of the book Hogan examines such issues as how universal principles of aesthetic response may be reconciled with individual idiosyncrasy how it is possible to argue rationally over aesthetic response and what role personal beauty and sublimity might play in the definition of art To treat these issues the book considers works by Woolf Wharton Shakespeare Arthur Miller Beethoven Matisse and Kiran Rao among others

Oral Poetics and Cognitive Science Mihailo Antovic, Cristóbal Pagán Cánovas, 2016-08-22 What can oral poetic traditions teach us about language and the human mind Oral Poetics has produced insights relevant not only for the study of traditional poetry but also for our general understanding of language and cognition formulaic style as a product of rehearsed improvisation the thematic structuring of traditional narratives or the poetic use of features from everyday speech among many others The cognitive sciences have developed frameworks that are crucial for research on oral poetics such as construction grammar or conversation analysis The key for connecting the two disciplines is their common focus on usage and performance This collection of papers explores how some of the latest research on language and cognition can contribute to advances in oral studies At the same time it shows how research on verbal art in its natural oral medium can lead to new insights in semantics pragmatics or multimodal communication The ultimate goal is to pave the way towards a Cognitive Oral Poetics a new interdisciplinary field for the study or oral poetry as a window to the mind

Cognition, Mindreading, and Shakespeare's Characters Nicholas R. Helms,2019-01-16 Cognition Mindreading and Shakespeare s Characters brings cognitive science to Shakespeare applying contemporary theories of mindreading to Shakespeare s construction of character Building on the work of the philosopher Alvin Goldman and cognitive literary critics such as Bruce McConachie and Lisa Zunshine Nicholas Helms uses the language of mindreading to analyze inference and imagination throughout Shakespeare s plays dwelling at length on misread minds in King Lear Much Ado About Nothing Othello and Romeo and Juliet Shakespeare manipulates the mechanics of misreading to cultivate an early modern audience of adept mindreaders an audience that continues to contemplate the moral ramifications of Shakespeare s characters even after leaving the playhouse Using this cognitive literary approach Helms reveals how misreading fuels Shakespeare s enduring popular appeal and investigates the ways in which Shakespeare s characters can both corroborate and challenge contemporary cognitive theories of the human mind

reaction or an internally synthesized identity approaching Shakespeare's plays and associated cultural practices in surprising and innovative ways

Ethical Sense and Literary Significance Donald R. Wehrs, 2023-07-31 This study blends together ethical philosophy, neurocognitive evolutionary studies, and literary theory to explore how imaginative discourse addresses a distinctively human deep sociality and by doing so helps shape cultural and literary history. Deep sociality arising from an improbable evolutionary history both entwines and leaves non-reconciled what is felt to be significant for us and what ethical sense seems to call us to acknowledge as significant independent of ourselves. Ethical Sense and Literary Significance connects literary and cultural history without reducing the literary to a mere expression of something else. It argues that affective differences between non-egocentric and egocentric registers of significance are integral to the bioculturally evolved deep sociality that verbal art addresses often in unsettling and socially critical ways. Much imaginative discourse in early societies as well as recent ones brings ethical sense and literary significance together in ways that reveal their intricate but non-harmonized internal entwinement. Drawing on contemporary scholarship in the humanities and sciences, Donald R. Wehrs explores the implications of interdisciplinary approaches to topics central to a wide range of fields beyond literary studies, including neuroscience, anthropology, phenomenological philosophy, comparative history, and social psychology.

The Elusive Brain Jason Daniel Tougaw, 2018-01-01 A highly original account of how literature and neuroscience interact to explain the relationship between the mind, body, and brain. *University of Michigan Official Publication*, University of Michigan, 1998. Each number is the catalogue of a specific school or college of the University.

Psyche and the Literary Muses Martin S. Lindauer, 2009-06-11 *Psyche and the Literary Muses* focuses on the psychology of literature from an empirical point of view rather than the more typical psychoanalytic position and concentrates on literary content rather than readers or writers. The book centers on the author's quantitative studies of brief literary and quasi-literary forms ranging from titles of short stories and names of literary characters to clichés and quotations from literary sources in demonstrating their contribution to the topics of learning, perception, thinking, emotions, creativity, and especially person perception and aging. More broadly, *Psyche* bears on literary studies, art, and psychology in general as well as interdisciplinarity. This book deepens the understanding and appreciation of literature for scholars, academics, and the general reader.

Medicine, Health and the Arts Victoria Bates, Alan Bleakley, Sam Goodman, 2013-10-23 In recent decades, both medical humanities and medical history have emerged as rich and varied sub-disciplines. *Medicine, Health and the Arts* is a collection of specially commissioned essays designed to bring together different approaches to these complex fields. Written by a selection of established and emerging scholars, this volume embraces a breadth and range of methodological approaches to highlight not only developments in well-established areas of debate but also newly emerging areas of investigation. New methodological approaches to the medical humanities and the value of the humanities in medical education. Divided into five sections, this text begins by offering an overview and analysis of the British and North American context. It then addresses in depth the

historical and contemporary relationship between visual art literature and writing performance and music There are three chapters on each art form which consider how history can illuminate current challenges and potential future directions Each section contains an introductory overview addressing broad themes and methodological concerns a case study of the impact of medicine health and well being on an art form and a case study of the impact of that art form on medicine health and wellbeing The underlining theme of the book is that the relationship between medicine health and the arts can only be understood by examining the reciprocal relationship and processes of exchange between them This volume promises to be a welcome and refreshing addition to the developing field of medical humanities Both informative and thought provoking it will be important reading for students academics and practitioners in the medical humanities and arts in health as well as health professionals and all scholars and practitioners interested in the questions and debates surrounding medicine health and the arts
