Nejat Veziroğlu, 1994 Lighting Dimensions, 1996 Research and Technology Program Digest United States. National Aeronautics and Space Administration, Research and Technology Program Digest Flash Index, 1967 Safety with Lasers and Other Optical Sources D. H. Sliney, J. Mellerio, 2013-11-11 Nearly a decade ago a general review article on the evaluation of optical radiation hazards was published in Applied Optics Sliney and Freasier 1973 This article received many favorable comments but also prompted many inquiries regarding specific optical hazard problems From this it became evident that a monograph rather than a supplemental and expanded article was needed to fill this literature gap relating to laser and optical radiation hazards The present work is designed to fill that gap and is structured to permit either classroom or self study use Much of the material in this book was developed in connection with short courses on laser safety and radiometry in which we have participated as well as from our previous articles In particular the sequence of chapters is based upon the experiences which we have had in lecturing in courses with different schedules One of the great difficulties in developing a text of this nature is that a broad multidisciplinary background must be included in order that the reader can comprehend all of the subject matter readily For this reason the material presented on anatomy and physiology is oriented toward the engineer or physical scientist while the review material on basic optical physics is intended more for the physician or life scientist **Commerce Business Daily**, 1999-08 **Handbook of Humidity Measurement, Volume 1** Ghenadii Korotcenkov, 2018-03-15 The first volume of The Handbook of Humidity Measurement focuses on the review of devices based on optical principles of measurement such as optical UV fluorescence hygrometers optical and fiber optic sensors of various types Numerous methods for monitoring the atmosphere have been developed in recent years based on measuring the absorption of electromagnetic field in different spectral ranges These methods covering the optical FTIR and Lidar techniques as well as a microwave and THz ranges are discussed in detail in this volume The role of humidity sensitive materials in optical and fiber optic sensors is also detailed This volume describes the reasons for controlling the humidity features of water and water vapors and units used for humidity measurement **Energy Research Abstracts**, 1977 **Electronic Design**, 1979 **Nuclear Medicine**, 1980 **Lasers & Optronics**, 1999 Nuclear medicine United States.
