**Field and Stream**, 1927      Making Camp Martin Hogue, 2023-05-09 A visual exploration and history of one of America's favorite pastimes Car camping hike in tent camping bivouacking mountaineering RV camping glamping back yard camping whatever your style outdoor adventure awaits For camping enthusiasts this fascinating and packable volume holds a comprehensive look at the origins of the practice and the ways that bring all these enthusiasts together From the early days of recreational camping in the late nineteenth century through the multitude of modern camping options available today Making Camp explores the history and evolution of the popular activity through the lens of its most important and familiar components the campsite the campfire the picnic table the map the tent the sleeping bag as well as the oft invisible systems for delivering water and managing trash Find out how early nineteenth century German peasants fashioned rudimentary sleeping bags by burrowing into bags full of leaves for the night Look back over several millennia to learn about the progression of tents from animal skins goat's hair and heavy canvas to featherweight nylon Learn about the ways in which the skills to build and maintain a campfire have been displaced by the portable gas stove Pinpoint the details of the essential campground map and its unique place in the camping imagination Each chapter includes a broad range of visuals to help illustrate the rich history of camping and our collective devotion to it including drawings patents diagrams sketches paintings advertisements and historical photographs A must have for avid campers nature lovers and all who seek to connect with the universe by sleeping under the stars      Tinkering Kathleen Franz, 2011-06-07 In the first decades after mass production between 1913 and 1939 middle class Americans not only bought cars but also enthusiastically redesigned them By examining the ways Americans creatively adapted their automobiles Tinkering takes a fresh look at automotive design from the bottom up as a process that included manufacturers engineers advice experts and consumers in various guises Franz argues that automobile ownership opened new possibilities for ingenuity among consumers even as large corporations came to control innovation Franz weaves together a variety of sources from serial fiction to corporate documents to explore tinkering as a form of authority in a culture that valued ingenuity Women drivers represented one group of consumers who used tinkering to advance their claim to social autonomy Some canny drivers moved beyond modifying their individual cars to become independent inventors patenting and selling automotive accessories for the burgeoning national demand for aftermarket products Earl S Tupper was one such tinkerer who went on to invent Tupperware These savvy tinkerers worked in a changing landscape of invention shaped increasingly by automotive giants By the 1930s Ford and General Motors worked to change the popular discourse of ingenuity and used the world's fairs of the Depression as a stage to promote a hierarchy of innovation Franz not only demonstrates the entrepreneurial spirit of American consumers but she engages larger historical questions about gender consumption and ingenuity while charting the impact corporate expansion on tinkering during the first half of the twentieth century      *Hardware World*, 1926      **Class**, 1925      Camping Grounds Phoebe S.K.

Young,2021-04-01 An exploration of the hidden history of camping in American life that connects a familiar recreational pastime to camps for functional needs and political purposes Camping appears to be a simple proposition a time honored way of getting away from it all Pack up the car and hit the road in search of a shady spot in the great outdoors For a modest fee reserve the basic infrastructure a picnic table a parking spot and a place to build a fire Pitch the tent and unroll the sleeping bags Sit under the stars with friends or family and roast some marshmallows This book reveals that for all its appeal the simplicity of camping is deceptive its history and meanings far from obvious Why do some Americans find pleasure in sleeping outside particularly when so many others past and present have had to do so for reasons other than recreation Never only a vacation choice camping has been something people do out of dire necessity and as a tactic of political protest Yet the dominant interpretation of camping as a modern recreational ideal has obscured the connections to these other roles A closer look at the history of camping since the Civil War reveals a deeper significance of this American tradition and its links to core beliefs about nature and national belonging Camping Grounds rediscovers unexpected and interwoven histories of sleeping outside It uses extensive research to trace surprising links between veterans tramps John Muir African American freedpeople Indian communities and early leisure campers in the nineteenth century tin can tourists federal campground designers Depression era transients family campers backpacking enthusiasts and political activists in the twentieth century and the crisis of the unsheltered and the tent based Occupy Movement in the twenty first These entwined stories show how Americans camp to claim a place in the American republic and why the outdoors is critical to how we relate to nature the nation and each other

Terence Young,2017-06-06 Who are the real campers Through hiking backpackers traversing the Appalachian Trail The family in an SUV making a tour of national parks and sleeping in tents at campgrounds People committed to the RV lifestyle who move their homes from state to state as season and whim dictate Terence Young would say all of the above Camping is one of the country s most popular pastimes tens of millions of Americans go camping every year Whether on foot on horseback or in RVs campers have been enjoying themselves for well more than a century during which time camping s appeal has shifted and evolved In Heading Out Young takes readers into nature and explores with them the history of camping in the United States Young shows how camping progressed from an impulse among city dwellers to seek temporary retreat from their exhausting everyday surroundings to a form of recreation so popular that an industry grew up around it to provide an endless supply of ever lighter and more convenient gear Young humanizes camping s history by spotlighting key figures in its development and a sampling of the campers and the variety of their excursions Readers will meet William H H Murray who launched a craze for camping in 1869 Mary Bedell who car camped around America for 12 000 miles in 1922 William Trent Jr who struggled to end racial segregation in national park campgrounds before World War II and Carolyn

Patterson who worked with the U S Department of State in the 1960s and 1970s to introduce foreign service personnel to the real America through trailer camping These and many additional characters give readers a reason to don a headlamp pull up a chair beside the campfire and discover the invigorating and refreshing history of sleeping under the stars Country Gentleman ,1925 **Sunset** ,1929 Hardware Retailer ,1926 Catalog of Copyright Entries. Part 1. [B] Group 2. Pamphlets, Etc. New Series Library of Congress. Copyright Office,1927 **Driven Wild** Paul S. Sutter,2009-11-23 In its infancy the movement to protect wilderness areas in the United States was motivated less by perceived threats from industrial and agricultural activities than by concern over the impacts of automobile owners seeking recreational opportunities in wild areas Countless commercial and government purveyors vigorously promoted the mystique of travel to breathtakingly scenic places and roads and highways were built to facilitate such travel By the early 1930s New Deal public works programs brought these trends to a startling crescendo The dilemma faced by stewards of the nation s public lands was how to protect the wild qualities of those places while accommodating and often encouraging automobile based tourism By 1935 the founders of the Wilderness Society had become convinced of the impossibility of doing both In *Driven Wild* Paul Sutter traces the intellectual and cultural roots of the modern wilderness movement from about 1910 through the 1930s with tightly drawn portraits of four Wilderness Society founders Aldo Leopold Robert Sterling Yard Benton MacKaye and Bob Marshall Each man brought a different background and perspective to the advocacy for wilderness preservation yet each was spurred by a fear of what growing numbers of automobiles aggressive road building and the meteoric increase in Americans turning to nature for their leisure would do to the country s wild places As Sutter discovered the founders of the Wilderness Society were driven wild pushed by a rapidly changing country to construct a new preservationist ideal Sutter demonstrates that the birth of the movement to protect wilderness areas reflected a growing belief among an important group of conservationists that the modern forces of capitalism industrialism urbanism and mass consumer culture were gradually eroding not just the ecology of North America but crucial American values as well For them wilderness stood for something deeply sacred that was in danger of being lost so that the movement to protect it was about saving not just wild nature but ourselves as well **The Canadian Countryman** ,1927 Catalogue of Title-entries of Books and Other Articles Entered in the Office of the Librarian of Congress, at Washington, Under the Copyright Law ...
