Collapsing Space And Time Geographic Aspects Of Communications And Information:

Collapsing Space and Time Stanley D. Brunn, Thomas R. Leinbach, 1991 A text which looks at such topics as geography and communication telecommunications services and economic restructuring as well as the political social and cultural aspects of communications expansion *Philosophy and Geography III* Andrew Light, Jonathan M. Smith, 1998 Places are today subject to contrary tendencies They lose some functions which may scale up to fewer more centralized places or down to numerous more dispersed places and they gain other functions which are scaling up and down from other places This prompts premature prophecies of the abolition of space and the obsolescence of place At the same time a growing literature testifies to the persistence of place as an incorrigible aspect of human experience identity and morality Place is a common ground for thought and action a community of experienced particulars that avoids solipsism and universalism It draws us into the philosophy of the ordinary into familiarity as a form of knowledge into the wisdom of proximity Each of these essays offers a philosophy of place and reminds us that such philosophies ultimately decide how we make use and understand places whether as accidents instruments or fields of care Global and Organizational Discourse about Information Technology Eleanor H. Wynn, Edgar A. Whitley, Michael D. Myers, Janice I. DeGross, 2013-06-29 Over the past 20 years the field of information systems has grown dramatically in theoretical diversity and global reach This growth is reflected in the language that policy makers and organizational stakeholders use when they talk about their IT plans As information technology penetrates further into organizational and global life it becomes ever more important to articulate assumptions embedded in the discourse This will help to clarify the complex and yet conceptually improvised or pasted up worldview that becomes embodied in systems The assumptions point to particular domains of discourse The discourse sets up conventions and boundaries It thus shapes what can or cannot legitimately be talked about researched addressed or solved within the scope of IT A number of practical and theoretical topics are discussed in detail including Globalization development and space Mobilization of power ERP systems IS planning and projects Critical research and the study of discourse Public institutions Analytical frameworks This book contains the selected proceedings of the Working Conference on Global and Organizational Discourse About Information Technology sponsored by the International Federation for Information Processing IFIP and held in Barcelona Spain in December 2002 McLuhan in Space Richard Cavell, 2002-01-01 Demonstrates how McLuhan extended insights derived from advances in physics and artistic experimentation into a theory of acoustic space which he then used to challenge the assumptions of visual space that had been produced through print culture **Routledge**

The Cybercities Reader Stephen Graham, 2004 Providing the most comprehensive international and interdisciplinary analysis yet of the relationships between cities urban life and new technologies this informative book incorporates detailed discussions of cybercity history

theory economic processes mobilities physical forms social and cultural worlds digital divides public domains strategies politics and futures The book includes coverage of post modern technoculture virtual reality and the body global city economies urban surveillance e commerce teleworking community informatics digital architecture urban technology strategies and the role of cities and new technologies in the war on terrorism The first interdisciplinary book to address the complex interrelationships between the use and application of electronic technologies and practices and processes of contemporary metropolitan life this key text adopts a uniquely international perspective Detailed case studies include virtual cities in Amsterdam Internet cabins in Lima back offices in Jamaica and smart highways in Melbourne An excellent teaching aid with part section and individual extract introductions this outstanding book provides an up to date snapshot of how policies for cities and cyberspaces are being combined across the world Community Journalism Midst Media Revolution Sue Robinson, 2016-04-14 This edited volume documents the changes taking place in local community practices globally Digital technologies and globalization have forced evolutions in how we go about producing and consuming journalism and these essays empirically and theoretically advance the scholarly conversations about those trends What does it mean to serve the information needs of a community in a digitized social world where so many of our ties weak and strong are at least partially maintained in virtual worlds With authors and data from all over the world this work celebrates a fundamental connectedness to citizens and their community and renews the emphasis on home as a mandate for any locally focused news organization The contributions to this volume explore the flows within both digital spaces and geographic places that are an important foreground to any conversation about what is community today Several terms are coined and explored in the volume including geosocial journalism and reciprocal journalism that account for the essentiality of information sharing in global public realms to inspire feelings of community belonging Other chapters include a review of Patch com one of the largest grassroots digital platforms for journalism a survey of how Norwegian community media organizations are adapting to digital worlds how Swedish citizen sites operate and the ethics of community journalists to advocate for their citizenry regarding digital matters Venturing towards both optimism and dismay the collection argues that understandings of communal borders have expanded So even if journalists cannot reach the current locals such as in Africa as one chapter relates or globally transient locals digital technologies can help relocate fractured community into a less problematic virtual space This requires commitment on the part of both journalists and citizens to preserve those connections utilize those technologies and exercise those fundamental principles of community journalism that go back more than half a century This book was originally published as a special issue of Journalism Practice **Cosmopolitan Communications** Pippa Norris, Ronald Inglehart, 2009-08-31 Societies around the world have experienced a flood of information from diverse channels originating beyond local communities and even national borders transmitted through the rapid expansion of cosmopolitan communications For more than half a century conventional interpretations Norris and Inglehart argue have

commonly exaggerated the potential threats arising from this process A series of firewalls protect national cultures This book develops a new theoretical framework for understanding cosmopolitan communications and uses it to identify the conditions under which global communications are most likely to endanger cultural diversity The authors analyze empirical evidence from both the societal level and the individual level examining the outlook and beliefs of people in a wide range of societies The study draws on evidence from the World Values Survey covering 90 societies in all major regions worldwide from 1981 to 2007 The conclusion considers the implications of their findings for cultural policies

When the Medium Was the Mission Jenna Supp-Montgomerie, 2021-02-16 FINALIST 2022 PROSE Award in Theology Religious Studies An innovative exploration of religion's influence on communication networks When Samuel Morse sent the words what hath God wrought from the US Supreme Court to Baltimore in mere minutes it was the first public demonstration of words travelling faster than human beings and farther than a line of sight in the US This strange confluence of media religion technology and US nationhood lies at the foundation of global networks The advent of a telegraph cable crossing the Atlantic Ocean was viewed much the way the internet is today to herald a coming world wide unification President Buchanan declared that the Atlantic Telegraph would be an instrument destined by divine providence to diffuse religion civilization liberty and law throughout the world through which the nations of Christendom would spontaneously unite Evangelical Protestantism embraced the new technology as indicating God's support for their work to Christianize the globe Public figures in the US imagined this new communication technology in primarily religious terms as offering the means to unite the world and inspire peaceful relations among nations Religious utopianists saw the telegraph as the dawn of a perfect future Religious framing thus dominated the interpretation of the technology's possibilities forging an imaginary of networks as connective so much so that connection is now fundamental to the idea of networks In reality however networks are marked at core by disconnection With lively historical sources and an accessible engagement with critical theory *When the Medium was the Mission* tells the story of how connection was made into the fundamental promise of networks illuminating the power of public Protestantism in the first network imaginaries which continue to resonate today in false expectations of connection
