The Art of Teaching Children Phillip Done, 2023-07-18 An essential guide for teachers and parents that is destined to become a classic. The Art of Teaching Children is one of those rare and masterful books that not only defines a craft but offers a magical reading experience. After more than thirty years in the classroom, award-winning teacher Phillip Done decided that it was time to retire. But a teacher's job is never truly finished, and he set out to write the greatest lesson of his career: a book for educators and parents that would pass along everything he learned about working with kids. From the first day of school jitters to the last day's tears, Done writes about the teacher's craft, classrooms and curriculums, the challenges of the profession, and the reason all teachers do it: the children. Drawing upon decades of experience, Done shares time-tested tips and sage advice. Real learning is messy, not linear. Greeting kids in the morning as they enter the classroom is an important part of the school day. If a student is having trouble, look at what you can do differently before pointing the finger at the child. Ask yourself: Would I want to be a student in my class? When children watch you, they are learning how to be people, and one of the most important things we can do for our students is to model the kind of people we would like them to be. Done tackles topics you won't find in any other teaching book, including Back to School Night nerves, teacher pride, the Sunday Blues, Pinterest envy, teacher guilt, and the things they never warn you about in teacher school but should like how to survive recess, duty, field trips, and lunch supervision. Done also addresses some of the most important issues schools face today: bullying, excessive screen time, the system's obsession with testing, teacher burnout, and the ever-increasing demands of meeting the diverse learning needs of students. But The Art of Teaching Children is more than a guide to educating today's young learners. These pages are alive with inspiration, humor, and tales of humanity. Done welcomes us like visitors at Open House Night to the world of elementary school, where we witness lessons that go well and others that flop, periods that run smoothly and ones that go haywire when a bee flies into the room. We meet master teachers and new ones, librarians and lunch supervisors, principals and parents, some with too much time on their hands. We get to know kids who want to hold a ball and those who'd rather hold a marker, students with difficult home lives and children with disabilities, youngsters who need drawing out, and those who happily announce in the middle of a math lesson that they have a loose tooth. With great wit and wisdom, irresistible storytelling, and boundless compassion, The Art of Teaching Children is the new educator's bible for teachers, parents, and all who work with kids and care about their learning and success.

The New Rules of College Admissions

Michael London, 2006-09-05 This all-in-one guide shows parents and students how to select, apply to, get accepted by, and pay for college from the experts at America's #1 educational consulting firm. The rules of college admissions have changed, and the competition today is tougher than ever. It's no longer enough to fill out a few applications and wish for the best. Students not only need to excel; they also need to make their applications stand out from the crowd. Parents often wish they had a personal coach to help their children navigate the process. The New Rules of College Admissions is like having your own team of

Theoretical Models and Processes of Literacy Donna E. Alvermann, Norman J. Unrau, Misty Sailors, Robert B. Ruddell, 2018-10-03 The Seventh Edition of this foundational text represents the most comprehensive source available for connecting multiple and diverse theories to literacy research broadly defined and features both cutting edge and classic contributions from top scholars Two decades into the 21st century the Seventh Edition finds itself at a crossroads and differs from its predecessors in three major ways the more encompassing term literacy replaces reading in the title to reflect sweeping changes in how readers and writers communicate in a digital era the focus is on conceptual essays rather than a mix of essays and research reports in earlier volumes and most notably contemporary literacy models and processes enhance and extend earlier theories of reading and writing Providing a tapestry of models and theories that have informed literacy research and instruction over the years this volume's strong historical grounding serves as a springboard from which new perspectives are presented The chapters in this volume have been selected to inspire the interrogation of literacy theory and to foster its further evolution This edition is a landmark volume in which dynamic dialogic and generative relations of power speak directly to the present generation of literacy theorists and researchers without losing the historical contexts that preceded them Some additional archival essays from previous editions are available on the book's eResource New to the Seventh Edition Features chapters on emerging and contemporary theories that connect directly to issues of power and contrasts new models against more established counterparts New chapters reflect sweeping changes in how readers and writers communicate in a digital era Slimmer volume is complemented by some chapters from previous editions available online The College Success Book James E. Groccia, 1992 Teaching Authentic Language Arts in a Test-Driven Era,

High Literacy in Secondary English Language Arts Marc Nachowitz, Kristen C. Wilcox, 2018-11-07 This volume culls scholarship on both what high literacy is and how it is developed It embraces the call put forth by Langer and Applebee 2016 that high literacy must continue to be our aim and to see more research analyzing and identifying how teachers might promote literacy practices that promote deep thinking around important content The editors offer a conceptual framework for high literacy that explicates how each component i.e. reading writing dialogic engagement and epistemic cognition in literary reasoning relates to the others and from what scholarly literature these concepts have been derived Individual

chapter authors provide in depth examinations of the existing research base on particular related topics focusing on the two important cross cutting aims of the volume 1 explicating the roles reading writing dialogic engagement and epistemic cognition hold in high literacy development and 2 providing examples of practices recommended to develop high literacy

Imagery and Text Mark Sadoski, Allan Paivio, 2013 Imagery and Text A Dual Coding Theory of Reading and Writing presents for the first time a unified theory of both reading and writing that derives from and is completely consistent with the Dual Coding Theory of cognition one of the most influential and empirically sound theories of cognition ever developed This is the first book to take a systematic theoretical approach to all of the central issues of literacy including decoding comprehension and memory in reading and planning drafting and reviewing in writing Additionally theoretical accounts are provided for such profound and elusive literacy concepts as meaning engagement inspiration and persona Dual Coding Theory is unique in theorizing how both verbal and nonverbal cognition are woven throughout all aspects of literacy An outstanding advancement in understanding literacy Imagery and Text A Dual Coding Theory of Reading and Writing Explains the major aspects of both reading and writing from an empirically well established cognitive theory that embraces both language and mental imagery emphasizing the powerful role of nonlinguistic knowledge and mental imagery in literacy Offers a human alternative to current computer based theories of cognition and literacy derived from artificial intelligence treating literacy as an essentially human activity that includes imagery and affect Provides moment by moment accounts of both the reading process and the writing process and comparisons with other theories and Presents an extensive review of educational research on the application of dual coding theory Bilingual Learners and Social Equity Ruth

Harman, 2017-08-13 This volume explores how educators conceptualized and implemented critical approaches to systemic functional linguistics that support bilingual students in appropriating and challenging dominant knowledge domains in K 16 contexts The researchers exhibit a shared commitment to enacting a culturally sustaining SFL praxis that validates multilingual meaning making pushes against social inequity and fosters creative re mixing of available semiotic resources It should prove a valuable resource for students teachers and researchers interested in applied linguistics education and critical theory
