G. Binmore, 2007 This volume brings together all of Ken Binmore's influential experimental papers on bargaining along with newly written commentary in which Binmore discusses the underlying game theory and addresses the criticism leveled at it by behavioral economists **BOOK JACKET** Experimental Economics Nicholas Bardsley, Robin Cubitt, Graham Loomes, Peter Moffatt, Chris Starmer, Robert Sugden, 2020-05-26 Since the 1980s there has been explosive growth in the use of experimental methods in economics leading to exciting developments in economic theory and policy Despite this the status of experimental economics remains controversial In Experimental Economics the authors draw on their experience and expertise in experimental economics economic theory the methodology of economics philosophy of science and the econometrics of experimental data to offer a balanced and integrated look at the nature and reliability of claims based on experimental research The authors explore the history of experiments in economics provide examples of different types of experiments and show that the growing use of experimental methods is transforming economics into a genuinely empirical science They explain that progress is being held back by an uncritical acceptance of folk wisdom regarding how experiments should be conducted a failure to acknowledge that different objectives call for different approaches to experimental design and a misplaced assumption that principles of good practice in theoretical modeling can be transferred directly to experimental design Experimental Economics debates how such limitations might be overcome and will interest practicing experimental economists nonexperimental economists wanting to interpret experimental research and philosophers of science concerned with the status of knowledge claims in economics **Population Games and Evolutionary Dynamics** William H. Sandholm, 2010-12-17 Evolutionary game theory studies the behaviour of large populations of strategically interacting agents is used by economists to predict in settings where traditional assumptions about the rationality of agents knowledge may be inapplicable **Enabling the Iranian Gas Export Options** Maximilian Kuhn, 2014-01-17 Maximilian Kuhn investigates one of the most pressing yet neglected subjects in the field of global energy politics the integration of the Iranian gas market Possessing the world's second largest proven natural gas reserves Iran is a hypothetical energy giant in waiting Yet over three decades of internal divisions coupled with crippling international sanctions have left Iran unable to capitalize on its vast energy potential Increasing global demand for natural gas and a government in constant need of finding new sources of revenue to meet the needs of a fast growing population should lead Iran to eventually become a large scale gas exporter How this could take place and what the implications for global gas markets would be are the central research questions tackled by this study The study allows a look beyond international politics Iranian political decision making
