### **Dreams of Presence**

Mitch Rose,2024-11-30 Throughout the twentieth century the question of culture was a central pillar of social scientific thought Today however the concept has disappeared from the academic landscape Despite pressing political debates about culture wars identity politics cultural appropriation and nativism the concept of culture is no longer seen as a credible explanatory tool Dreams of Presence provides a novel theoretical approach to the question of culture and will be of use to geographers anthropologists sociologists and social theorists grappling to understand why culture continues to be a dominant political force in our contemporary world Drawing on Heidegger Levinas Derrida and i ek Mitch Rose provides an existential rather than sociological account of culture conceptualizing it as a refuge where subjects endeavour to establish ownership over a life that perpetually eludes them The book argues that culture is a claim not something subjects ever have but something they desire not something properly present but a dream of presence an imagination of identity we cultivate care for and materially build in order to assure ourselves that we are sovereign self standing beings

### **Remembering the Cultural Geographies of a Childhood Home**

Peter Hughes Jachimciak,2016-04-08 Using an innovative auto ethnographic approach to investigate the otherness of the places that make up the childhood home and its neighbourhood in relation to memory derived and memory imbued cultural geographies Remembering the Cultural Geographies of a Childhood Home is concerned with childhood spaces and children s perspectives of those spaces and consequentially with the personalised locations that make up the childhood family home and its immediate surroundings such as the garden the street etc Whilst this book is primarily structured by the author s memories of living in his own Welsh childhood home during the 1970s that is the auto ethnographic framework it is as much about living anywhere amid the remembered cultural remnants of the past as it is immersing oneself in cultural geographies of the here and now As a result Remembering the Cultural Geographies of a Childhood Home is part of the ongoing pursuit by cultural geographers to provide a personal exploration of the pluralities of shared landscapes whereby such an engagement with space and place aid our construction of cognitive maps of meaning that

in turn manifest themselves as both individual and collective cultural experiences Furthermore touching upon our co habiting of ghost topologies Remembering the Cultural Geographies of a Childhood Home also encourages a critical exploration of children s spirituality amid the haunted cultural and geographical spaces and places of a house and its neighbourhood the cellar hallway parlour stairs bedroom attic shops cemeteries and so on **United States Educational, Scientific, and Cultural Motion Pictures and Filmstrips, Selected and Available for Use Abroad: Education Section, 1958, Education and Productivity** United States Information Agency,1959 **Landscapes of a New Cultural Economy of Space** Theano S. Terkenli,Anne-Marie d'Hauteserre,2006-07-13 Making sense of new cultural economies it is argued needs consistent attention to the resonances of individual lives Otherwise a discussion of cultural economies remains suspended in a detached virtualism Miller 2000 The idea of the remaking of geographies and cultural economies remains necessarily a consistent search to make the subject dynamic in its resonance with the contemporary world In recent debates concerning the reframing of the cultural economies of geography there is an evidence of increasing acknowledgement of the overlooked importance of subjectivities within geographical explanation This has often been difficult when trying to attend to the large scale apparent dynamics of change The shift of geographies to focus upon cultural economies combines two profound threads that inform this chapter the acknowledgement of the breadth and inclusivity of what economies are and the refusal mutually to isolate the cultural and the economic Thus the economic becomes engaged and even framed in relation to the cultural and vice versa Such an appraisal makes more robust the limits of either or claims from these two grounding components of geographical thinking and its representation of the world These themes are sustained in different ways across the chapters of this book This chapter seeks to build a critical discourse concerning space embodied practice and lay knowledge It does this in order to address the mechanisms through which individuals are engaged in the processes of new cultural economies
